Stokes Wood Primary School

CONTENTS OF HANDBOOK

1. The Forest School Ethos
2. Our Forest School Code of Conduct
3. Suggested Activities for Forest Schools
4. Equipment for Forest School
5. Using and Storing Tools
6. Health and Safety Policies
7. Safeguarding Children, Confidentiality & Forest School
8. Equal Opportunities, Inclusion and Forest School
9. Risk Assessment Guidelines
10. Accident and Emergency Procedures
11. Poor Weather Procedures
12. Designated Person Responsibilities
13. Insurance Requirements
14. School Parent Agreement

A decorative border of small green trees with brown trunks surrounds the page. The trees are arranged in a grid-like pattern, with a row of 15 trees at the top, a row of 15 trees at the bottom, and vertical columns of trees on the left and right sides.

Stokes Wood Primary School

1. The Forest School Ethos

Forest School is a unique educational experience that offers children the opportunity to develop their confidence and self-esteem through hands-on learning in a woodland environment. Children engage in motivating and achievable tasks and activities throughout the year and in almost all weathers. Children will work with tools, play, learn boundaries of behaviour; both physical and social, grow in confidence, self-esteem and motivation whilst developing an understanding of the natural world.

The Forest School concept originates in Scandinavia. It was originally aimed at pre-school children and those that attended sessions showed well developed social and communication skills, were more able to work in a group, developed higher levels of self-esteem and were confident when completing activities.

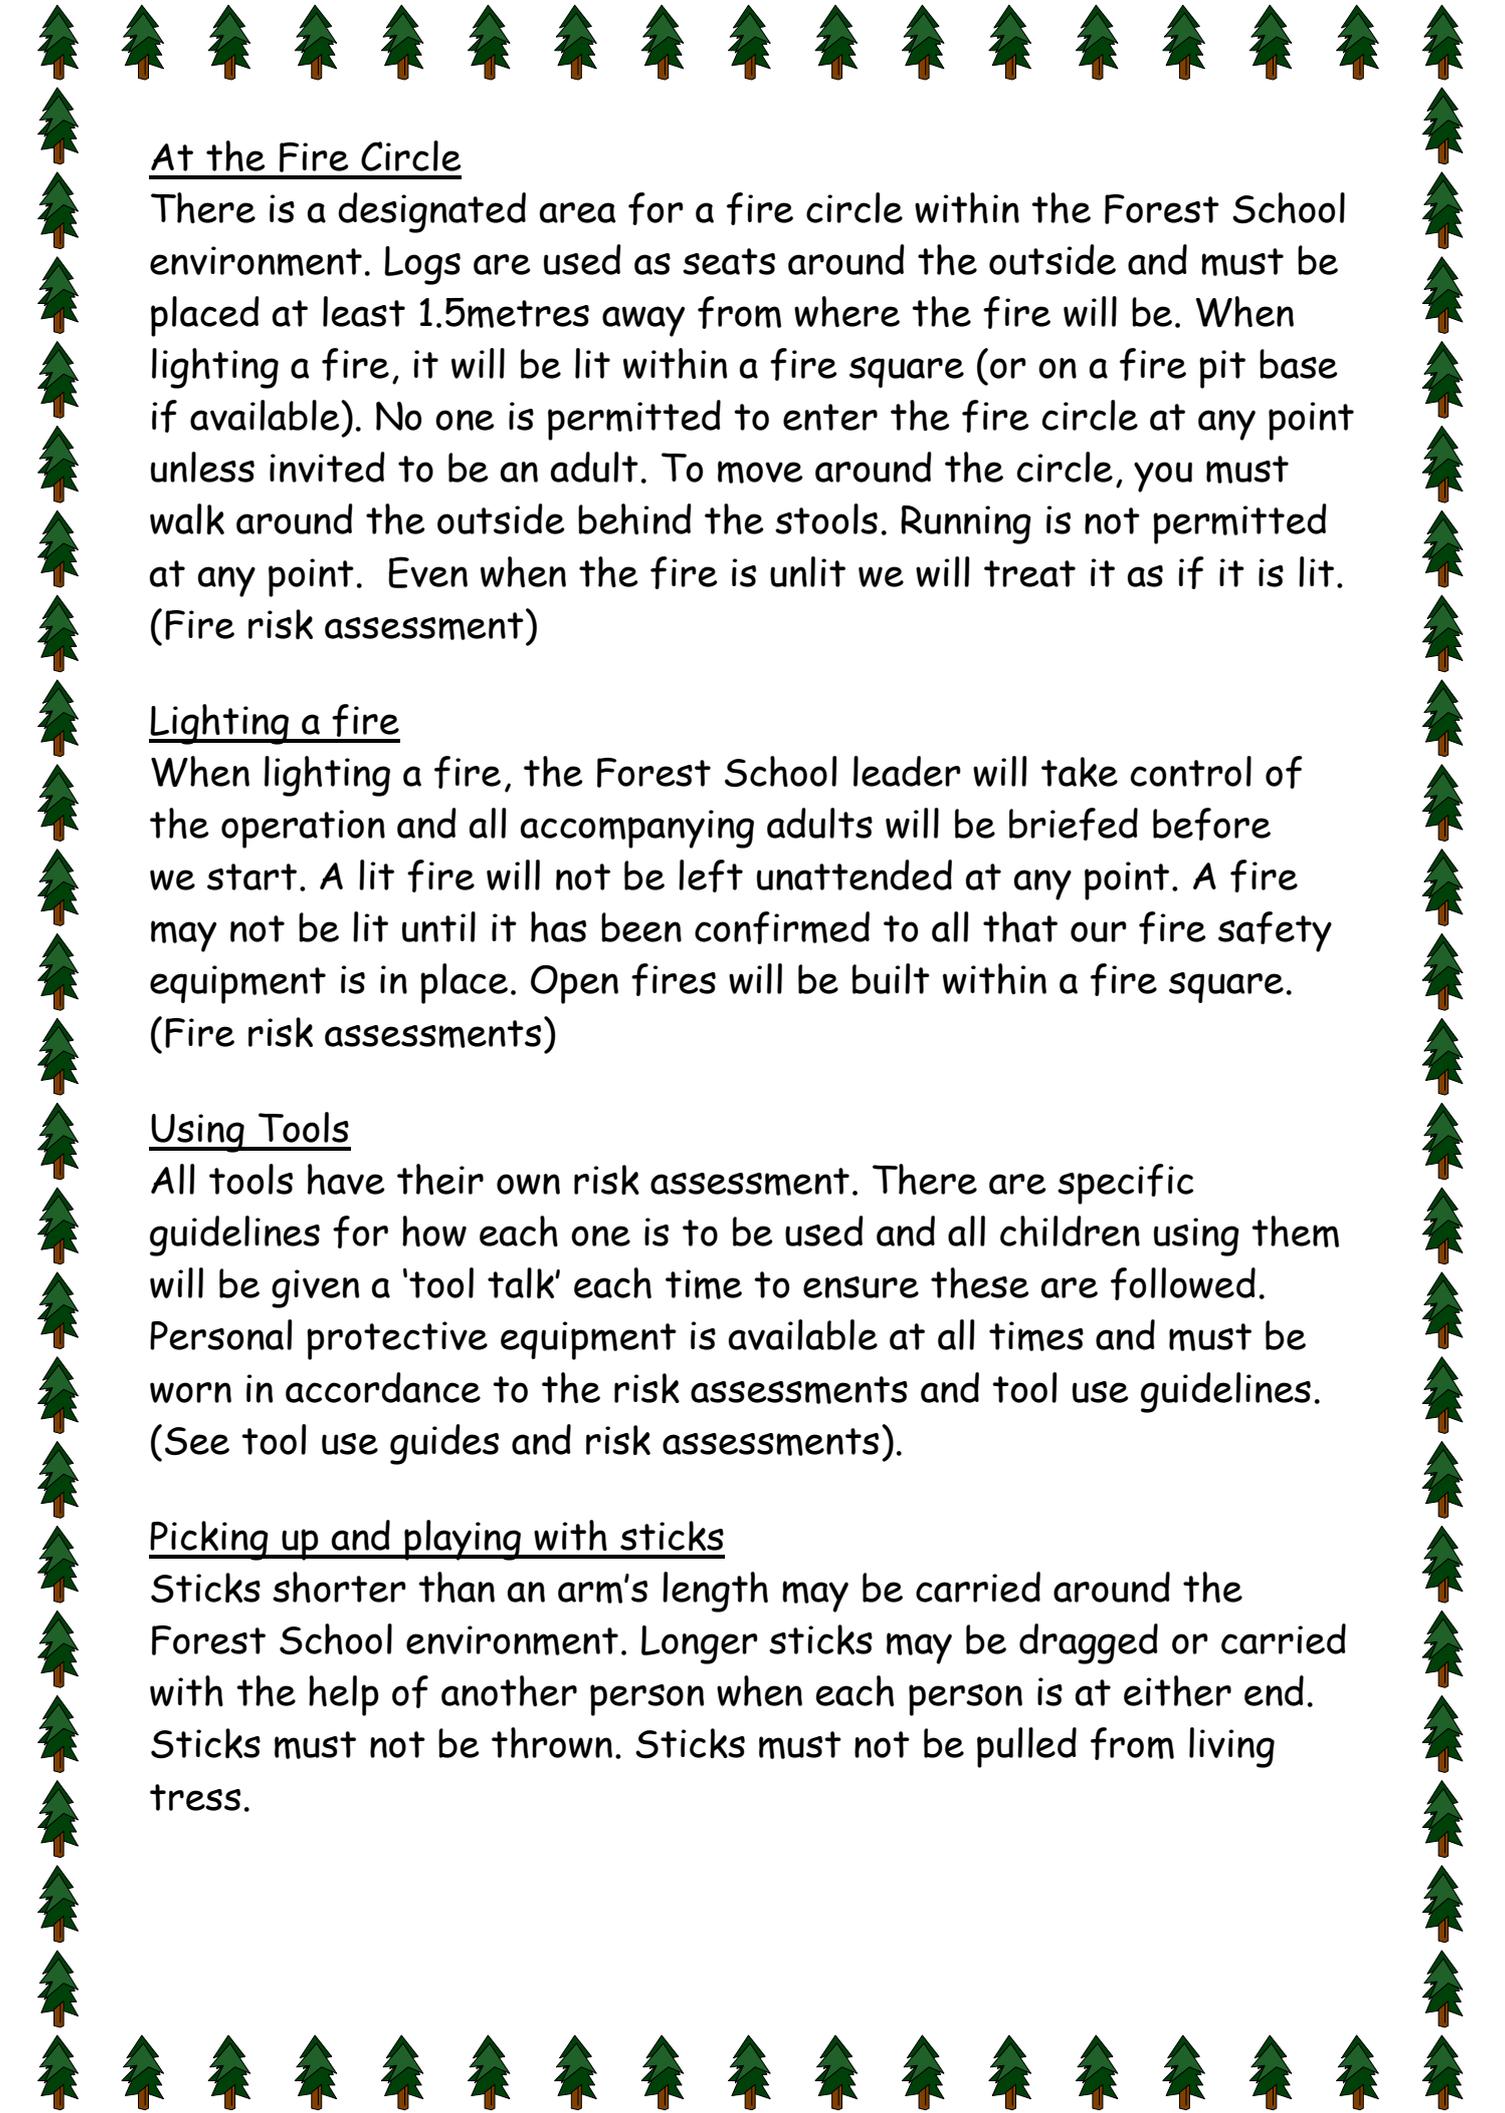

2. Our Forest School Code of Conduct

Entering the Forest

When we attend Forest School sessions, we know that we have to be respectful to the environment and remember there are living things there too. We will have the opportunity to explore and investigate in a safe enough manner and without damaging the Forest environment. We also know that there are specific expectations for behaviour throughout the session.

Boundaries

Before each session begins children are made aware of how far they can explore and of any fixed boundary markers. If children move to explore hidden areas an adult should also move into the cover deep enough to be able to see the children but allowing the children the freedom to explore independently. The children have been taught to return to an adult as soon as they hear the signal '1,2,3, where are you?' (Site risk assessment)

At the Fire Circle

There is a designated area for a fire circle within the Forest School environment. Logs are used as seats around the outside and must be placed at least 1.5metres away from where the fire will be. When lighting a fire, it will be lit within a fire square (or on a fire pit base if available). No one is permitted to enter the fire circle at any point unless invited to be an adult. To move around the circle, you must walk around the outside behind the stools. Running is not permitted at any point. Even when the fire is unlit we will treat it as if it is lit. (Fire risk assessment)

Lighting a fire

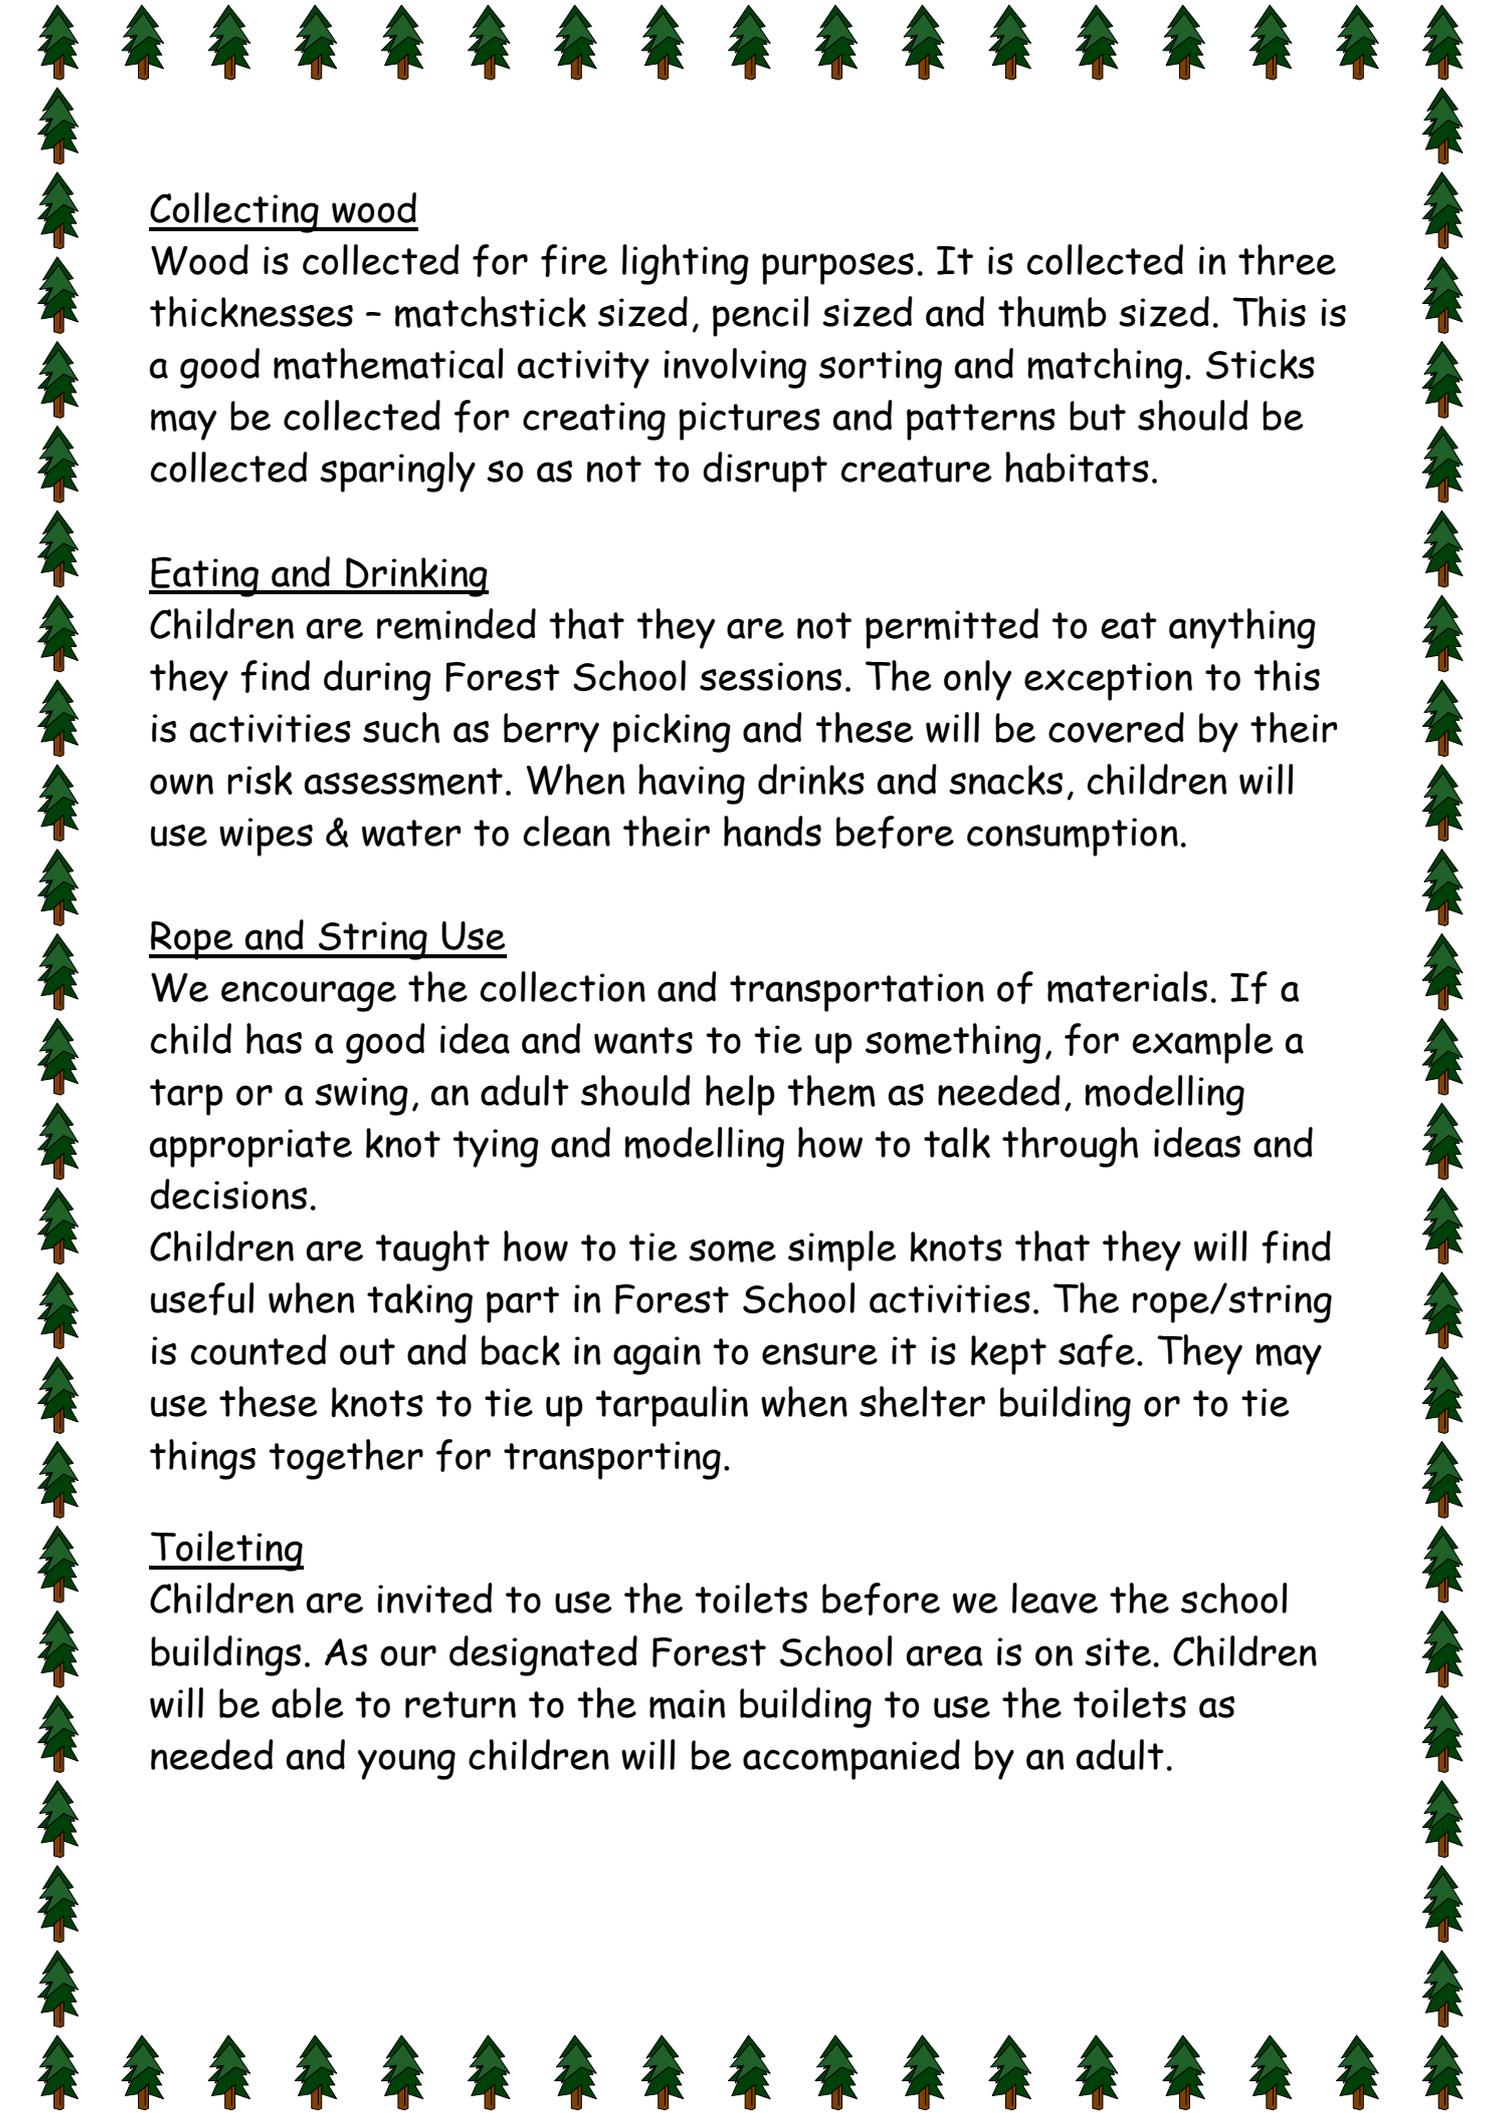

When lighting a fire, the Forest School leader will take control of the operation and all accompanying adults will be briefed before we start. A lit fire will not be left unattended at any point. A fire may not be lit until it has been confirmed to all that our fire safety equipment is in place. Open fires will be built within a fire square. (Fire risk assessments)

Using Tools

All tools have their own risk assessment. There are specific guidelines for how each one is to be used and all children using them will be given a 'tool talk' each time to ensure these are followed. Personal protective equipment is available at all times and must be worn in accordance to the risk assessments and tool use guidelines. (See tool use guides and risk assessments).

Picking up and playing with sticks

Sticks shorter than an arm's length may be carried around the Forest School environment. Longer sticks may be dragged or carried with the help of another person when each person is at either end. Sticks must not be thrown. Sticks must not be pulled from living tress.

Collecting wood

Wood is collected for fire lighting purposes. It is collected in three thicknesses - matchstick sized, pencil sized and thumb sized. This is a good mathematical activity involving sorting and matching. Sticks may be collected for creating pictures and patterns but should be collected sparingly so as not to disrupt creature habitats.

Eating and Drinking

Children are reminded that they are not permitted to eat anything they find during Forest School sessions. The only exception to this is activities such as berry picking and these will be covered by their own risk assessment. When having drinks and snacks, children will use wipes & water to clean their hands before consumption.

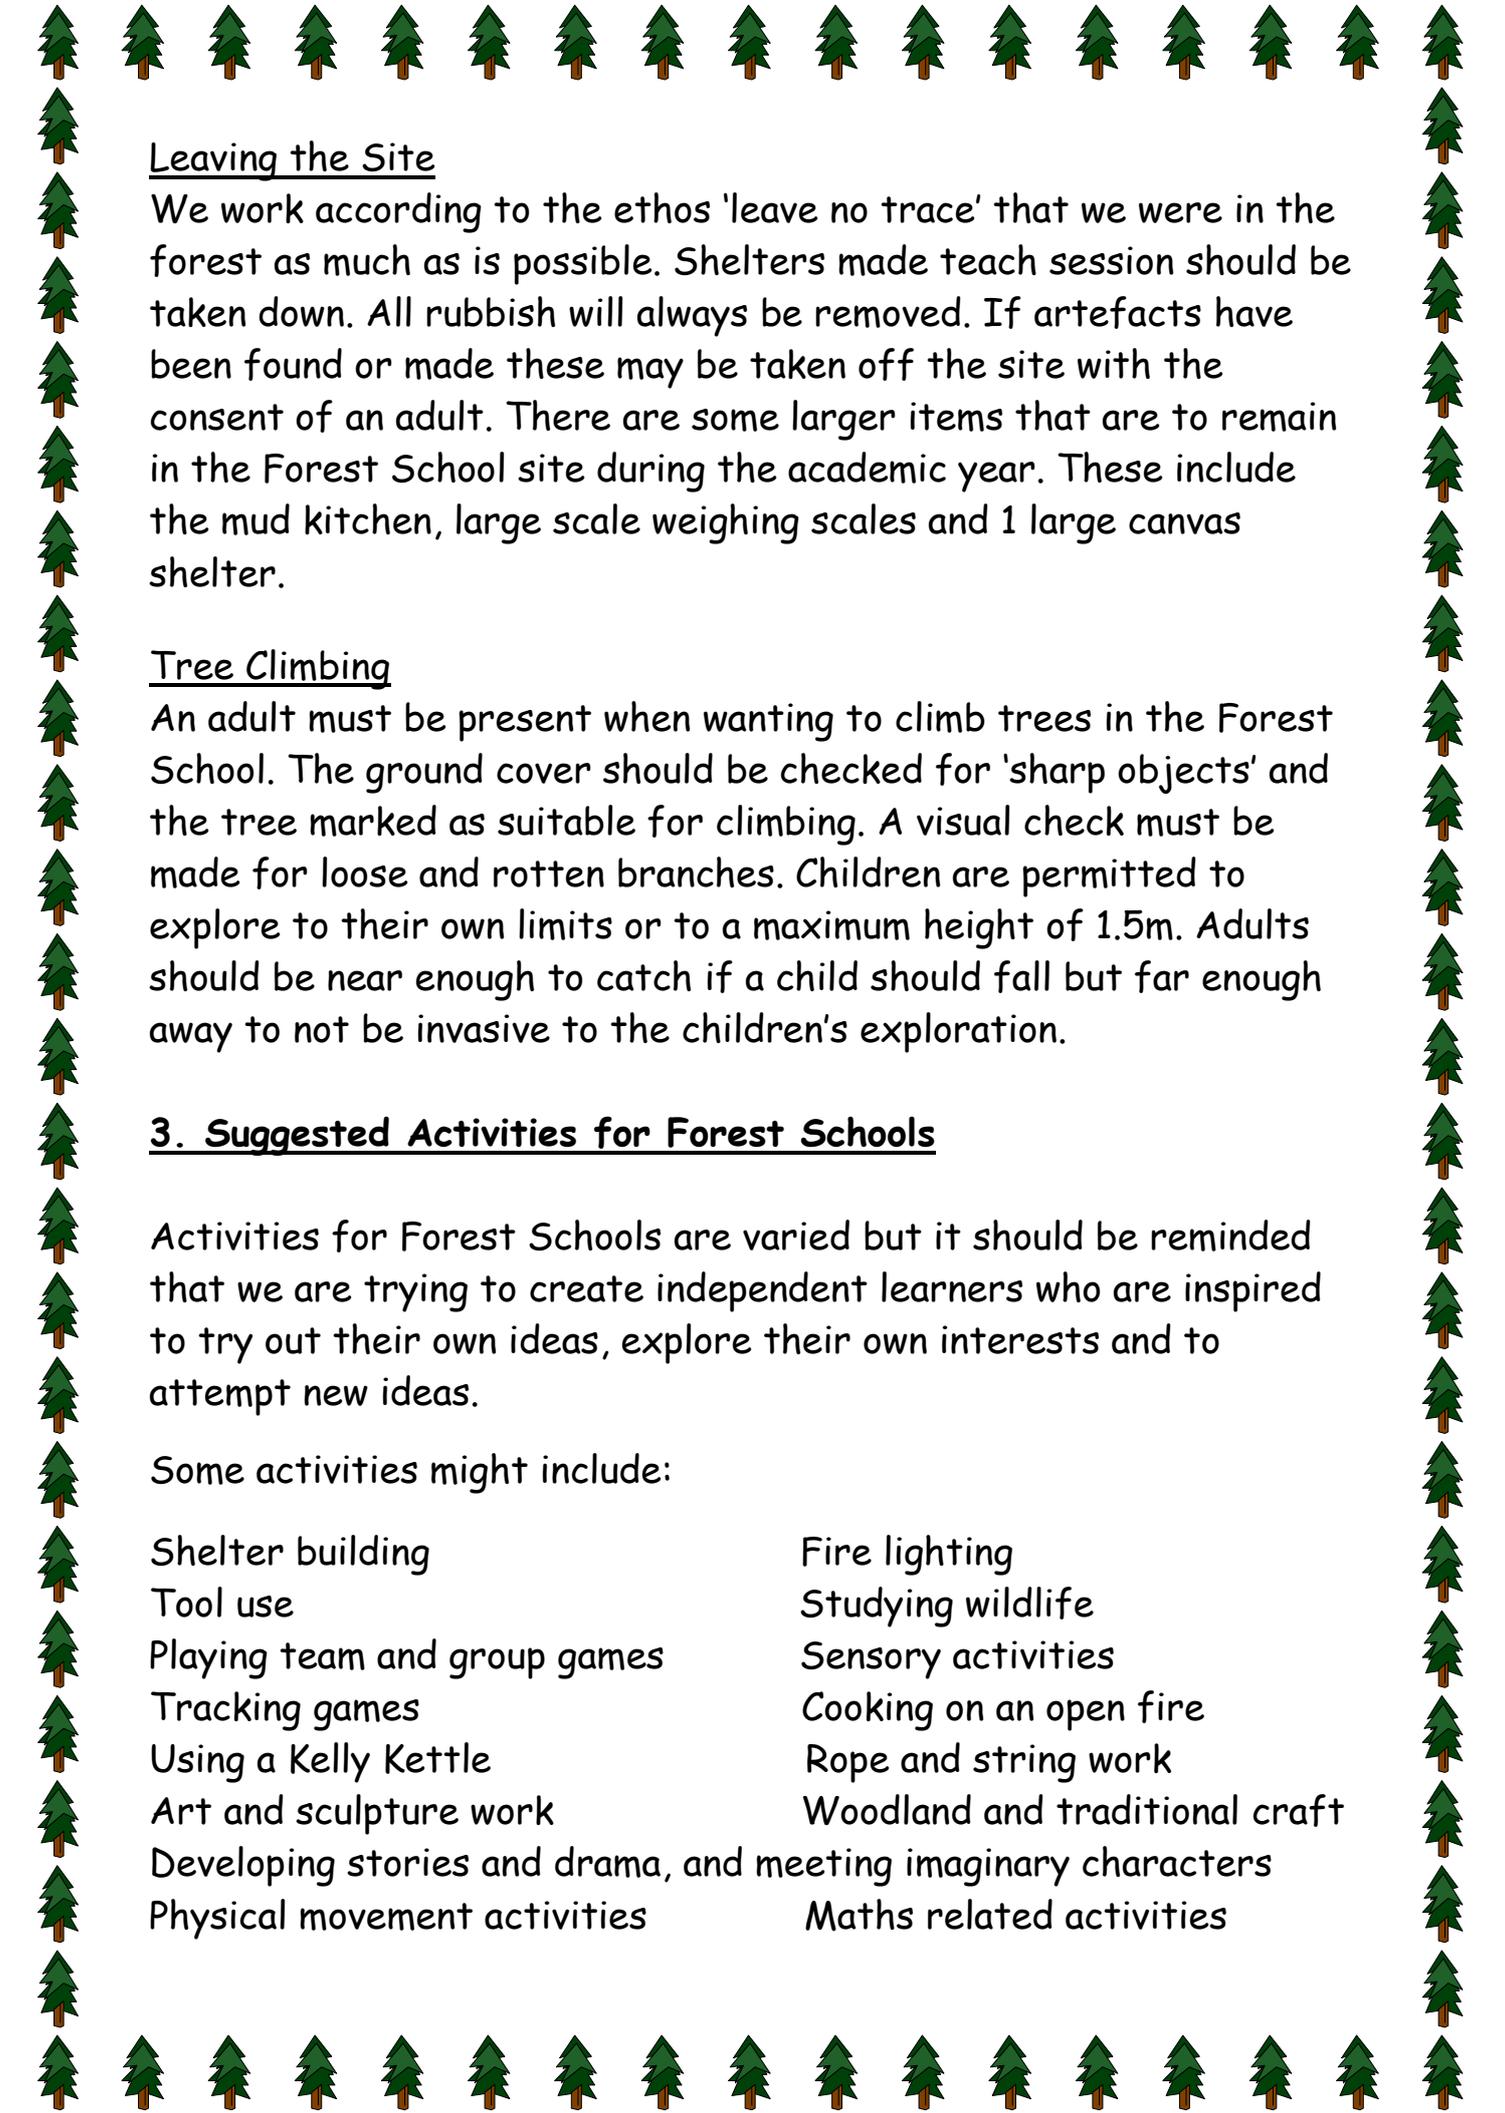

Rope and String Use

We encourage the collection and transportation of materials. If a child has a good idea and wants to tie up something, for example a tarp or a swing, an adult should help them as needed, modelling appropriate knot tying and modelling how to talk through ideas and decisions.

Children are taught how to tie some simple knots that they will find useful when taking part in Forest School activities. The rope/string is counted out and back in again to ensure it is kept safe. They may use these knots to tie up tarpaulin when shelter building or to tie things together for transporting.

Toileting

Children are invited to use the toilets before we leave the school buildings. As our designated Forest School area is on site. Children will be able to return to the main building to use the toilets as needed and young children will be accompanied by an adult.

A decorative border of small green trees with brown trunks surrounds the text. The trees are arranged in a single row at the top and bottom, and in vertical columns on the left and right sides.

Leaving the Site

We work according to the ethos 'leave no trace' that we were in the forest as much as is possible. Shelters made teach session should be taken down. All rubbish will always be removed. If artefacts have been found or made these may be taken off the site with the consent of an adult. There are some larger items that are to remain in the Forest School site during the academic year. These include the mud kitchen, large scale weighing scales and 1 large canvas shelter.

Tree Climbing

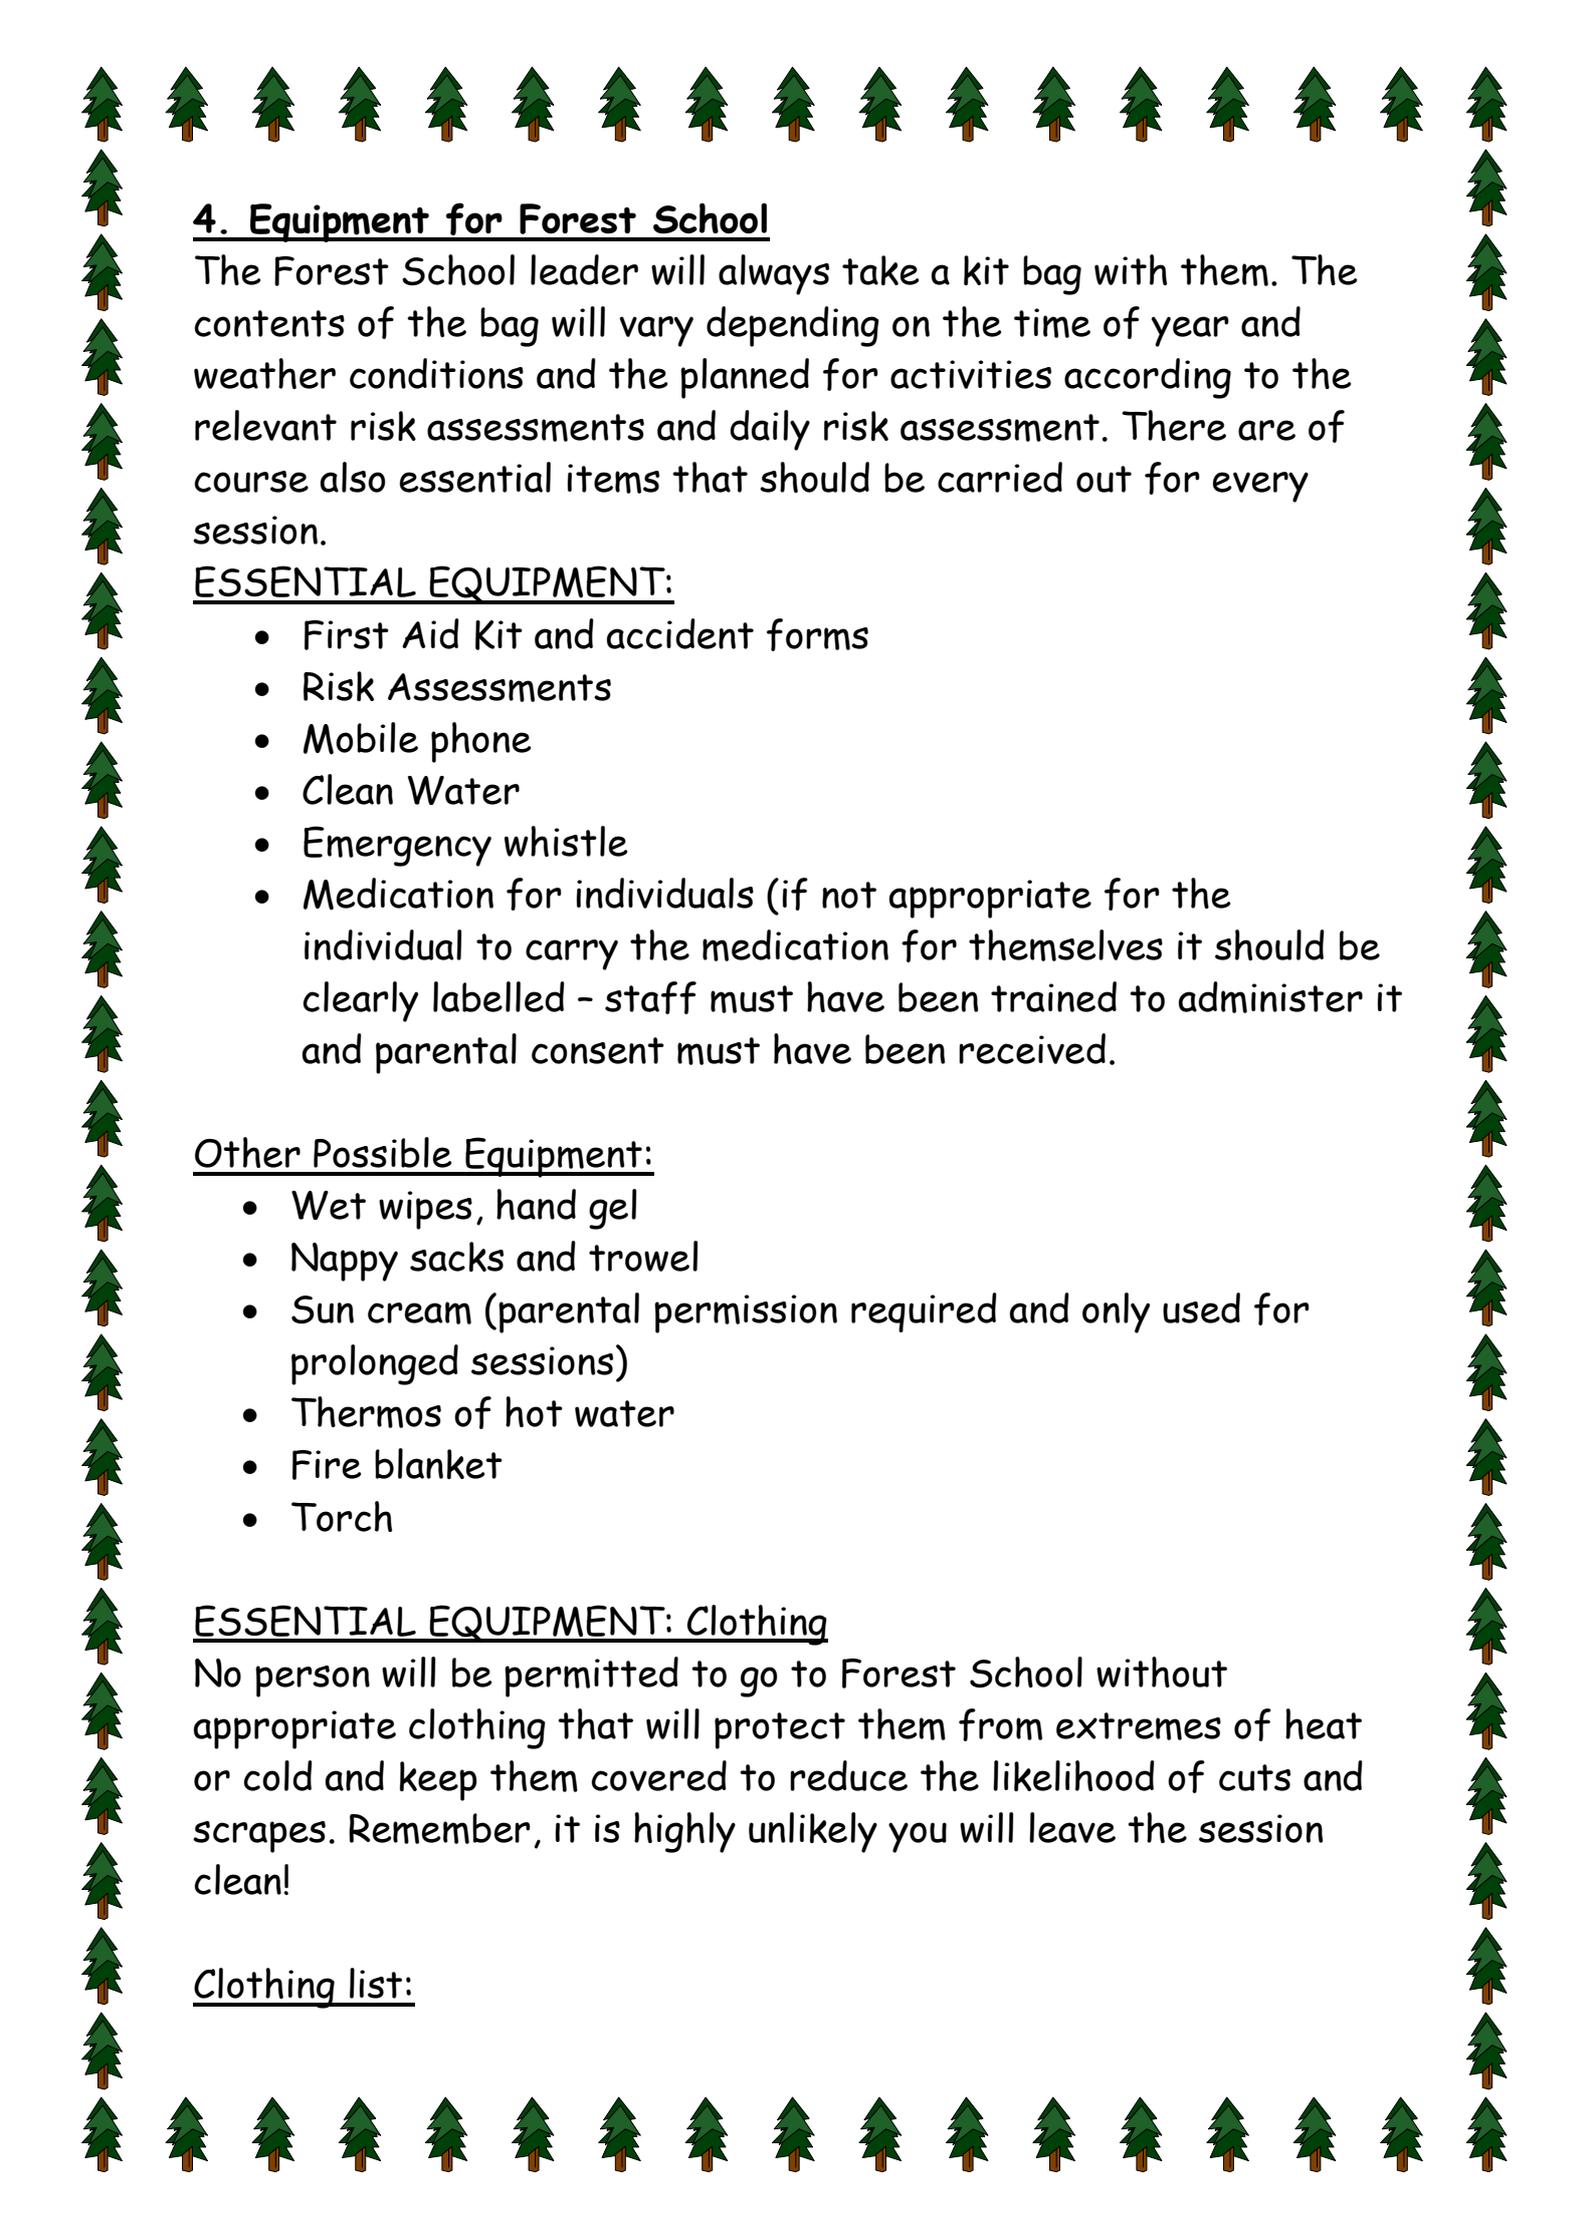

An adult must be present when wanting to climb trees in the Forest School. The ground cover should be checked for 'sharp objects' and the tree marked as suitable for climbing. A visual check must be made for loose and rotten branches. Children are permitted to explore to their own limits or to a maximum height of 1.5m. Adults should be near enough to catch if a child should fall but far enough away to not be invasive to the children's exploration.

3. Suggested Activities for Forest Schools

Activities for Forest Schools are varied but it should be reminded that we are trying to create independent learners who are inspired to try out their own ideas, explore their own interests and to attempt new ideas.

Some activities might include:

- | | |
|--|--------------------------------|
| Shelter building | Fire lighting |
| Tool use | Studying wildlife |
| Playing team and group games | Sensory activities |
| Tracking games | Cooking on an open fire |
| Using a Kelly Kettle | Rope and string work |
| Art and sculpture work | Woodland and traditional craft |
| Developing stories and drama, and meeting imaginary characters | |
| Physical movement activities | Maths related activities |

4. Equipment for Forest School

The Forest School leader will always take a kit bag with them. The contents of the bag will vary depending on the time of year and weather conditions and the planned for activities according to the relevant risk assessments and daily risk assessment. There are of course also essential items that should be carried out for every session.

ESSENTIAL EQUIPMENT:

- First Aid Kit and accident forms
- Risk Assessments
- Mobile phone
- Clean Water
- Emergency whistle
- Medication for individuals (if not appropriate for the individual to carry the medication for themselves it should be clearly labelled - staff must have been trained to administer it and parental consent must have been received.

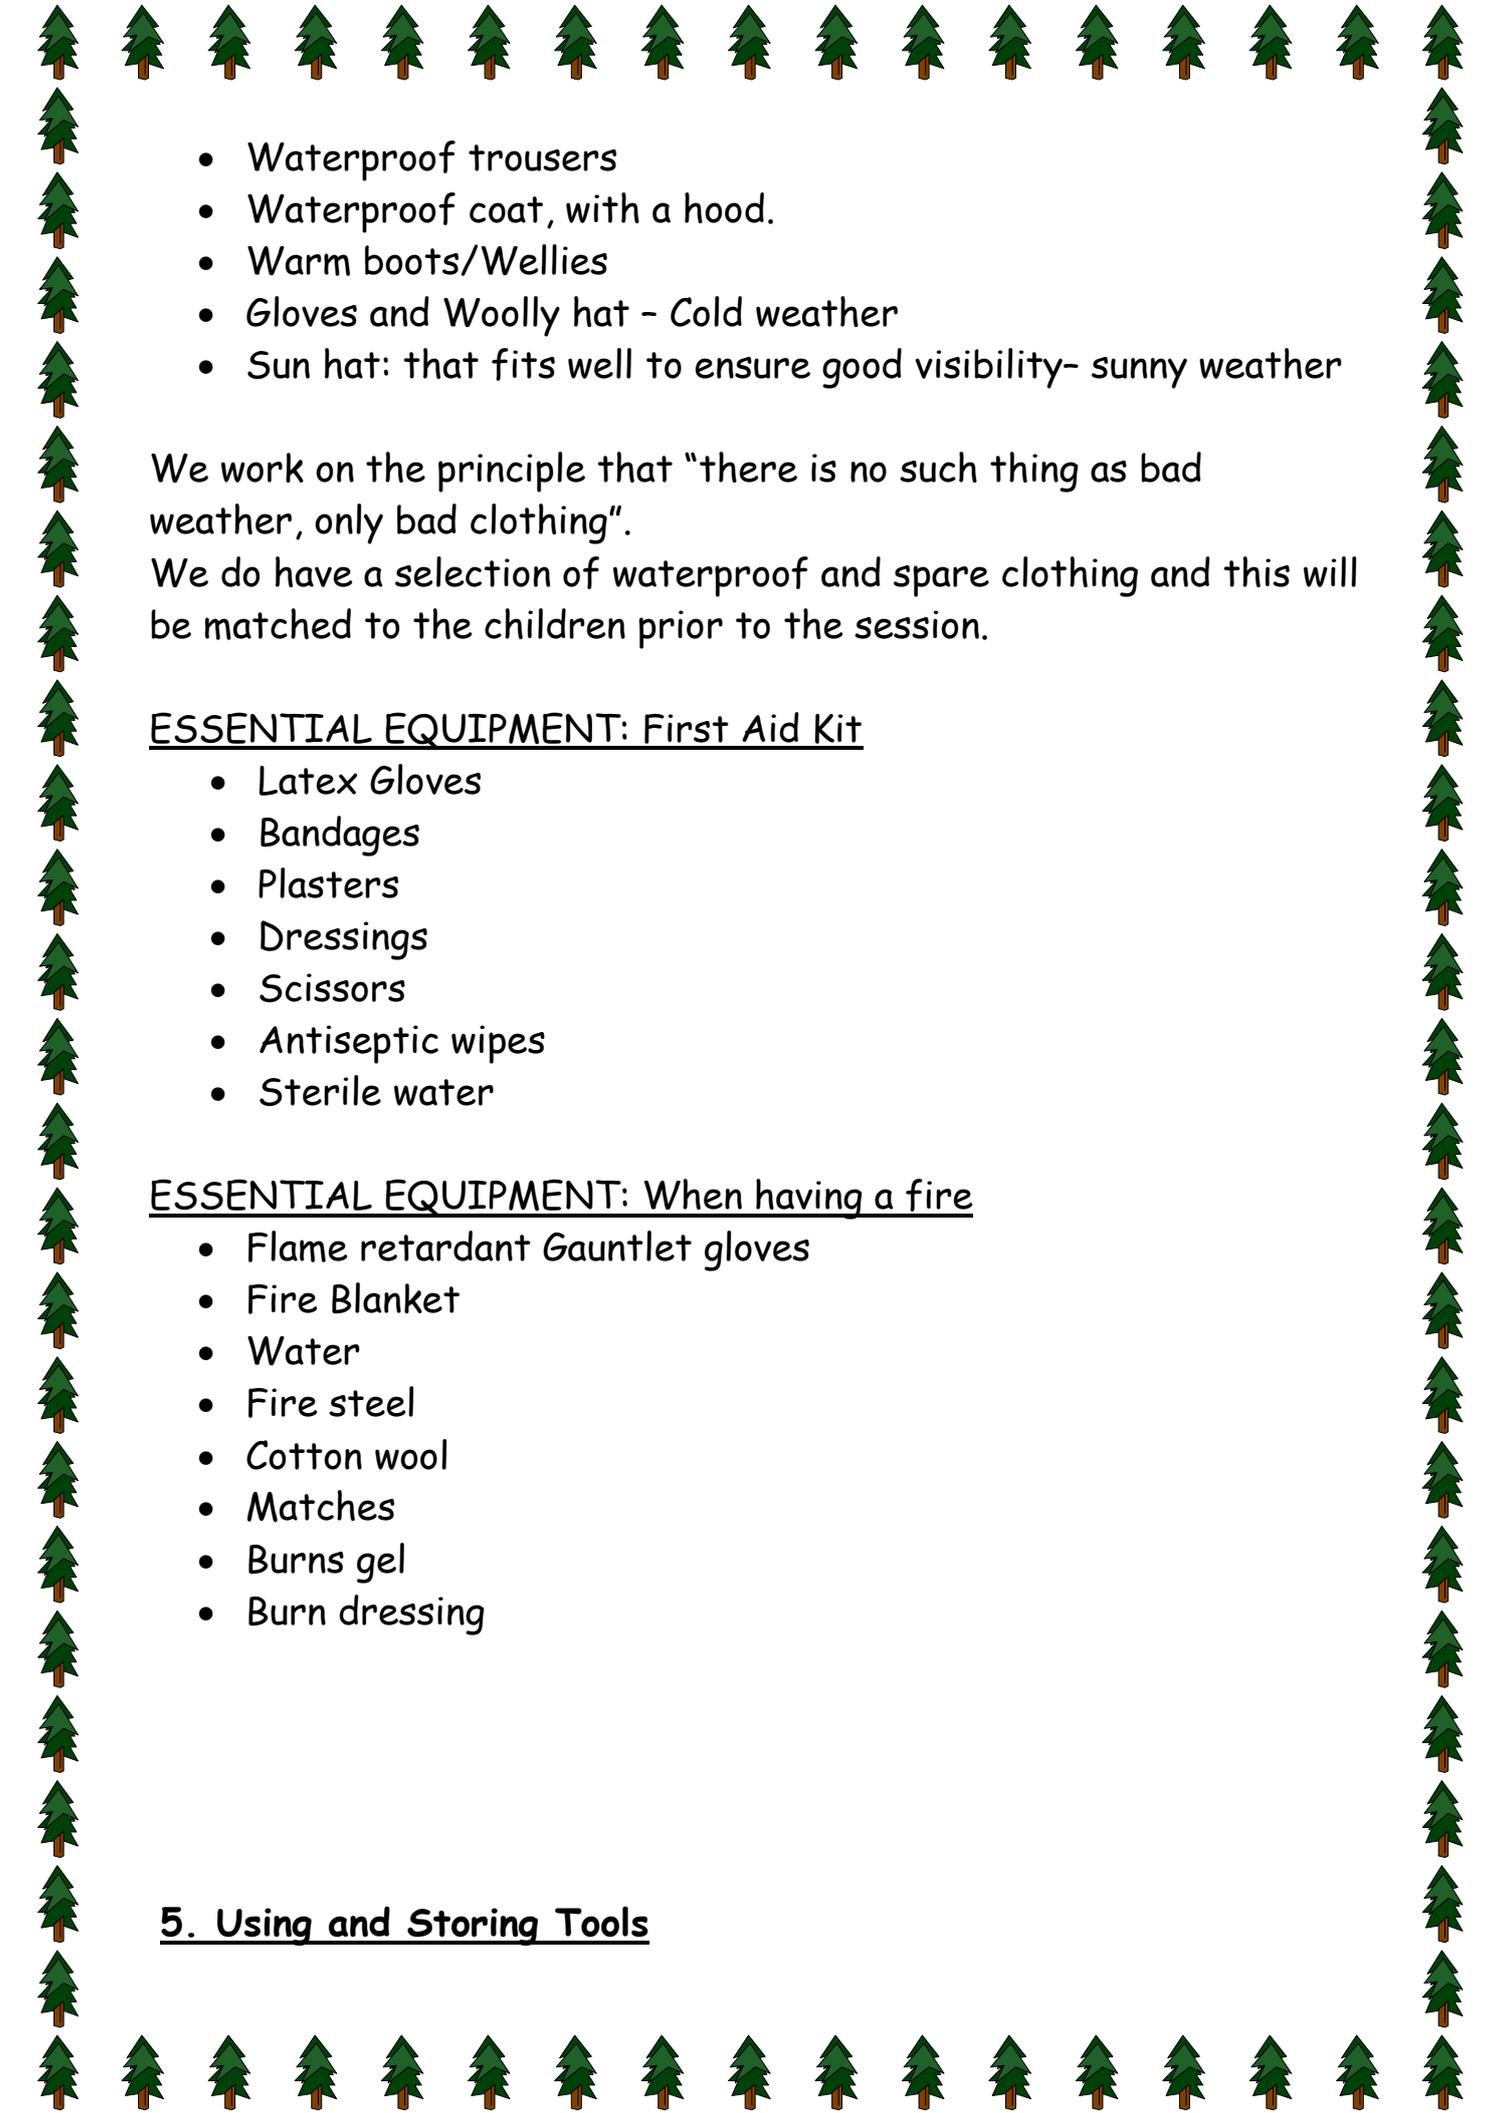

Other Possible Equipment:

- Wet wipes, hand gel
- Nappy sacks and trowel
- Sun cream (parental permission required and only used for prolonged sessions)
- Thermos of hot water
- Fire blanket
- Torch

ESSENTIAL EQUIPMENT: Clothing

No person will be permitted to go to Forest School without appropriate clothing that will protect them from extremes of heat or cold and keep them covered to reduce the likelihood of cuts and scrapes. Remember, it is highly unlikely you will leave the session clean!

Clothing list:

- 
- Waterproof trousers
 - Waterproof coat, with a hood.
 - Warm boots/Wellies
 - Gloves and Woolly hat - Cold weather
 - Sun hat: that fits well to ensure good visibility- sunny weather

We work on the principle that "there is no such thing as bad weather, only bad clothing".

We do have a selection of waterproof and spare clothing and this will be matched to the children prior to the session.

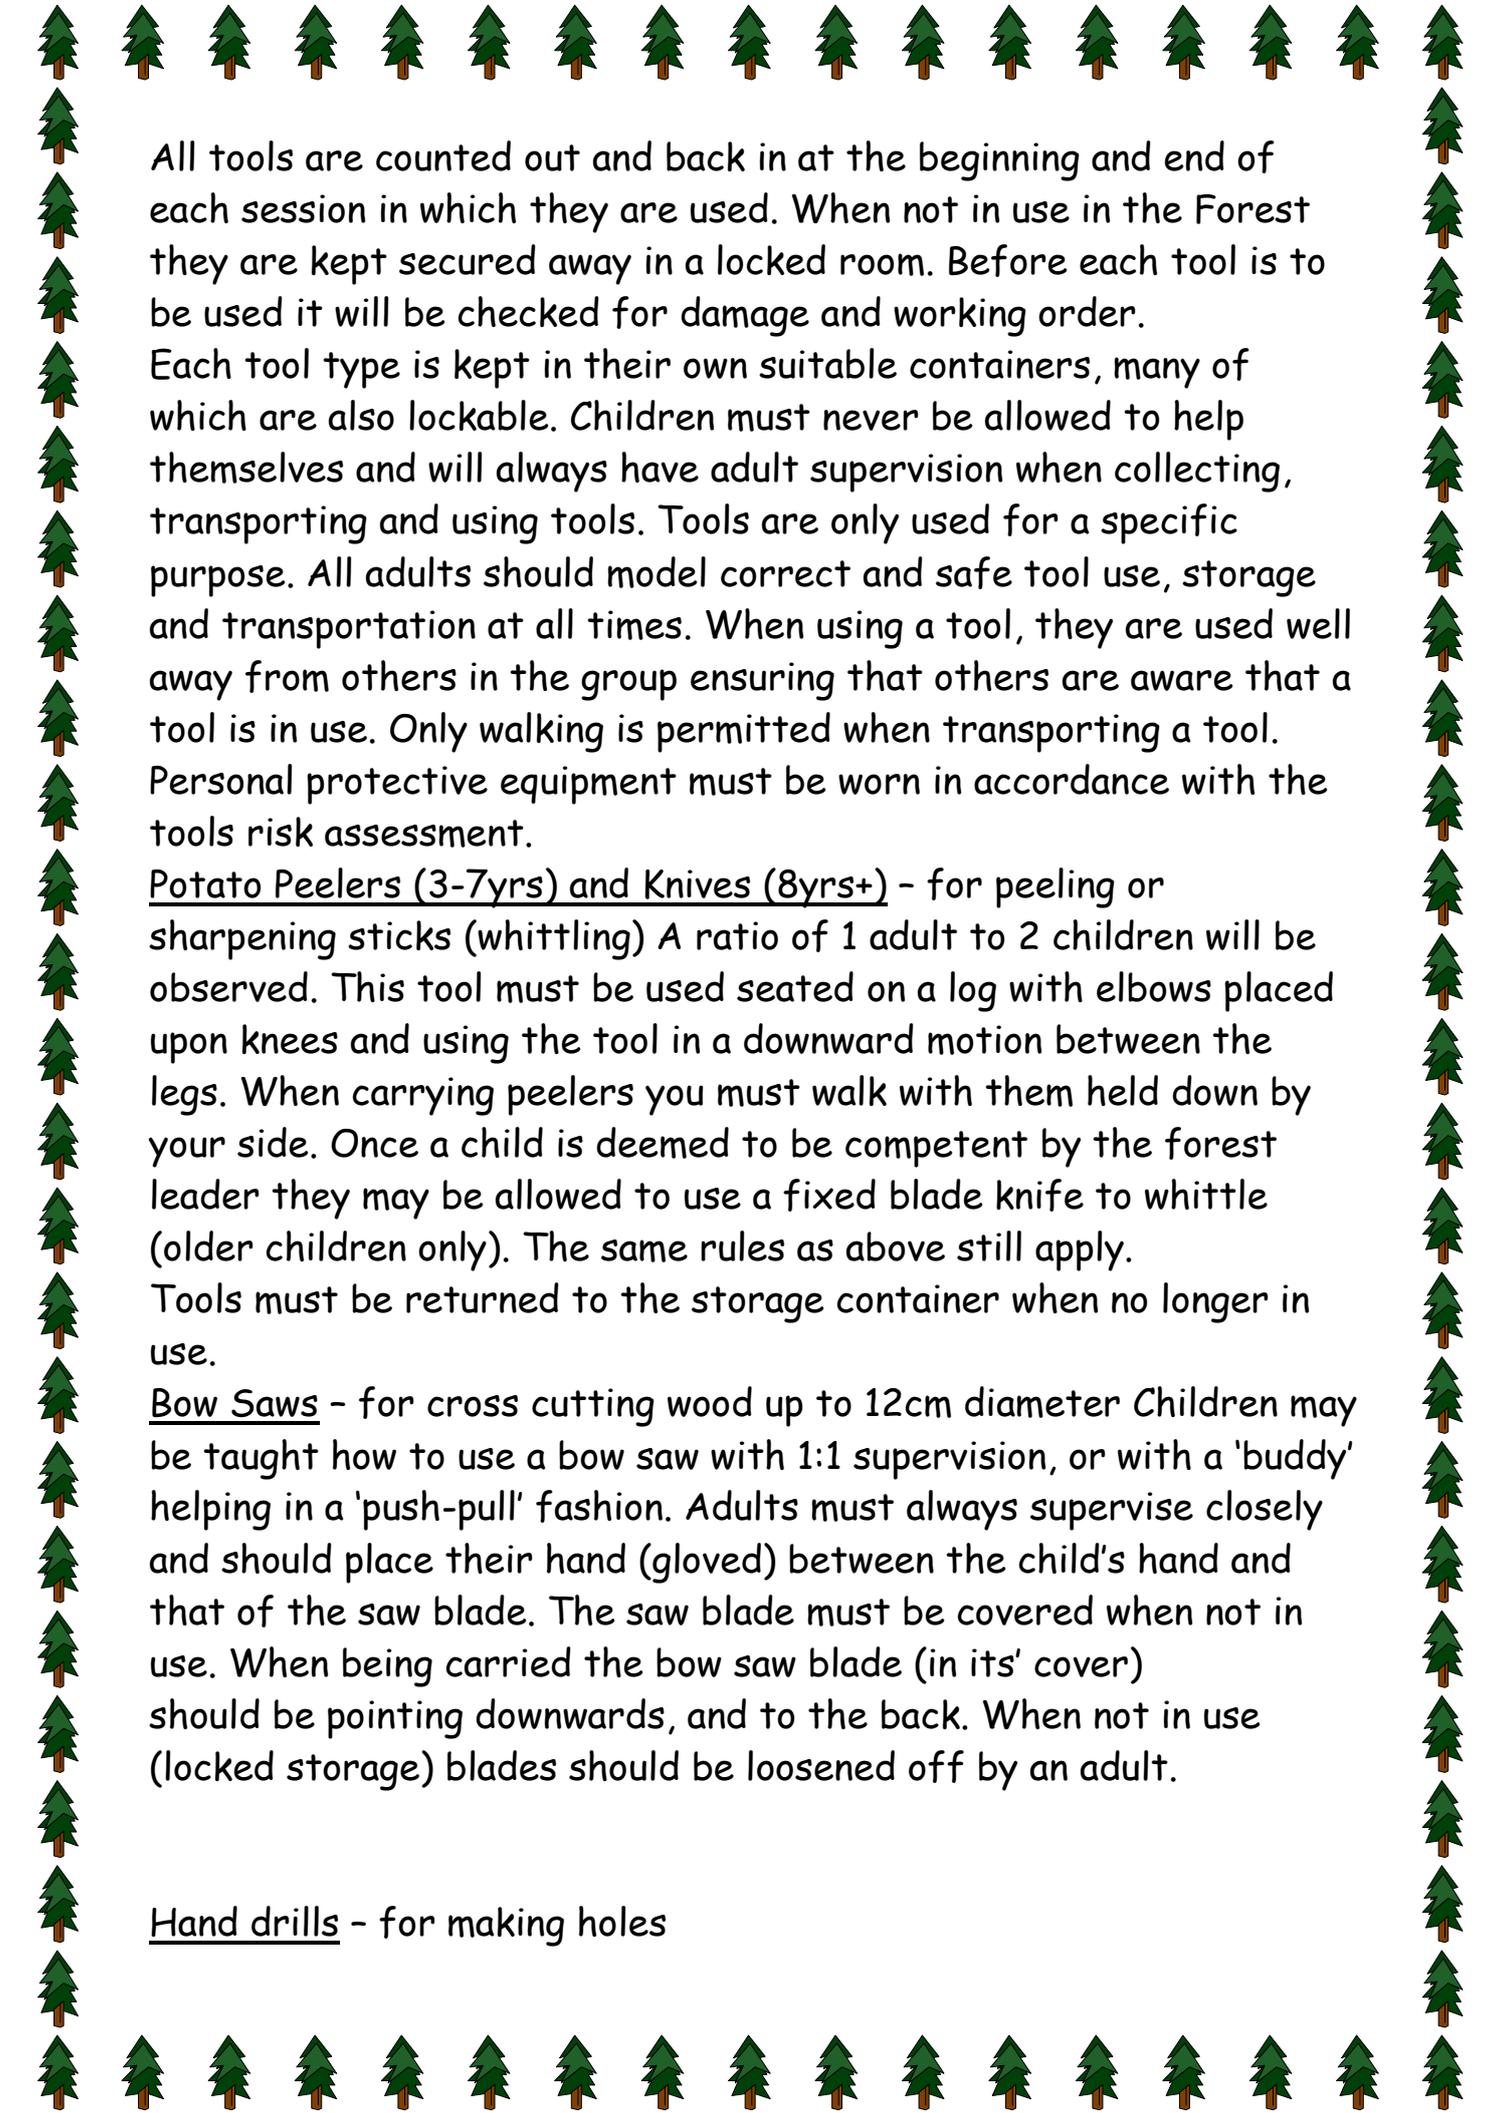

ESSENTIAL EQUIPMENT: First Aid Kit

- Latex Gloves
- Bandages
- Plasters
- Dressings
- Scissors
- Antiseptic wipes
- Sterile water

ESSENTIAL EQUIPMENT: When having a fire

- Flame retardant Gauntlet gloves
- Fire Blanket
- Water
- Fire steel
- Cotton wool
- Matches
- Burns gel
- Burn dressing

5. Using and Storing Tools

All tools are counted out and back in at the beginning and end of each session in which they are used. When not in use in the Forest they are kept secured away in a locked room. Before each tool is to be used it will be checked for damage and working order.

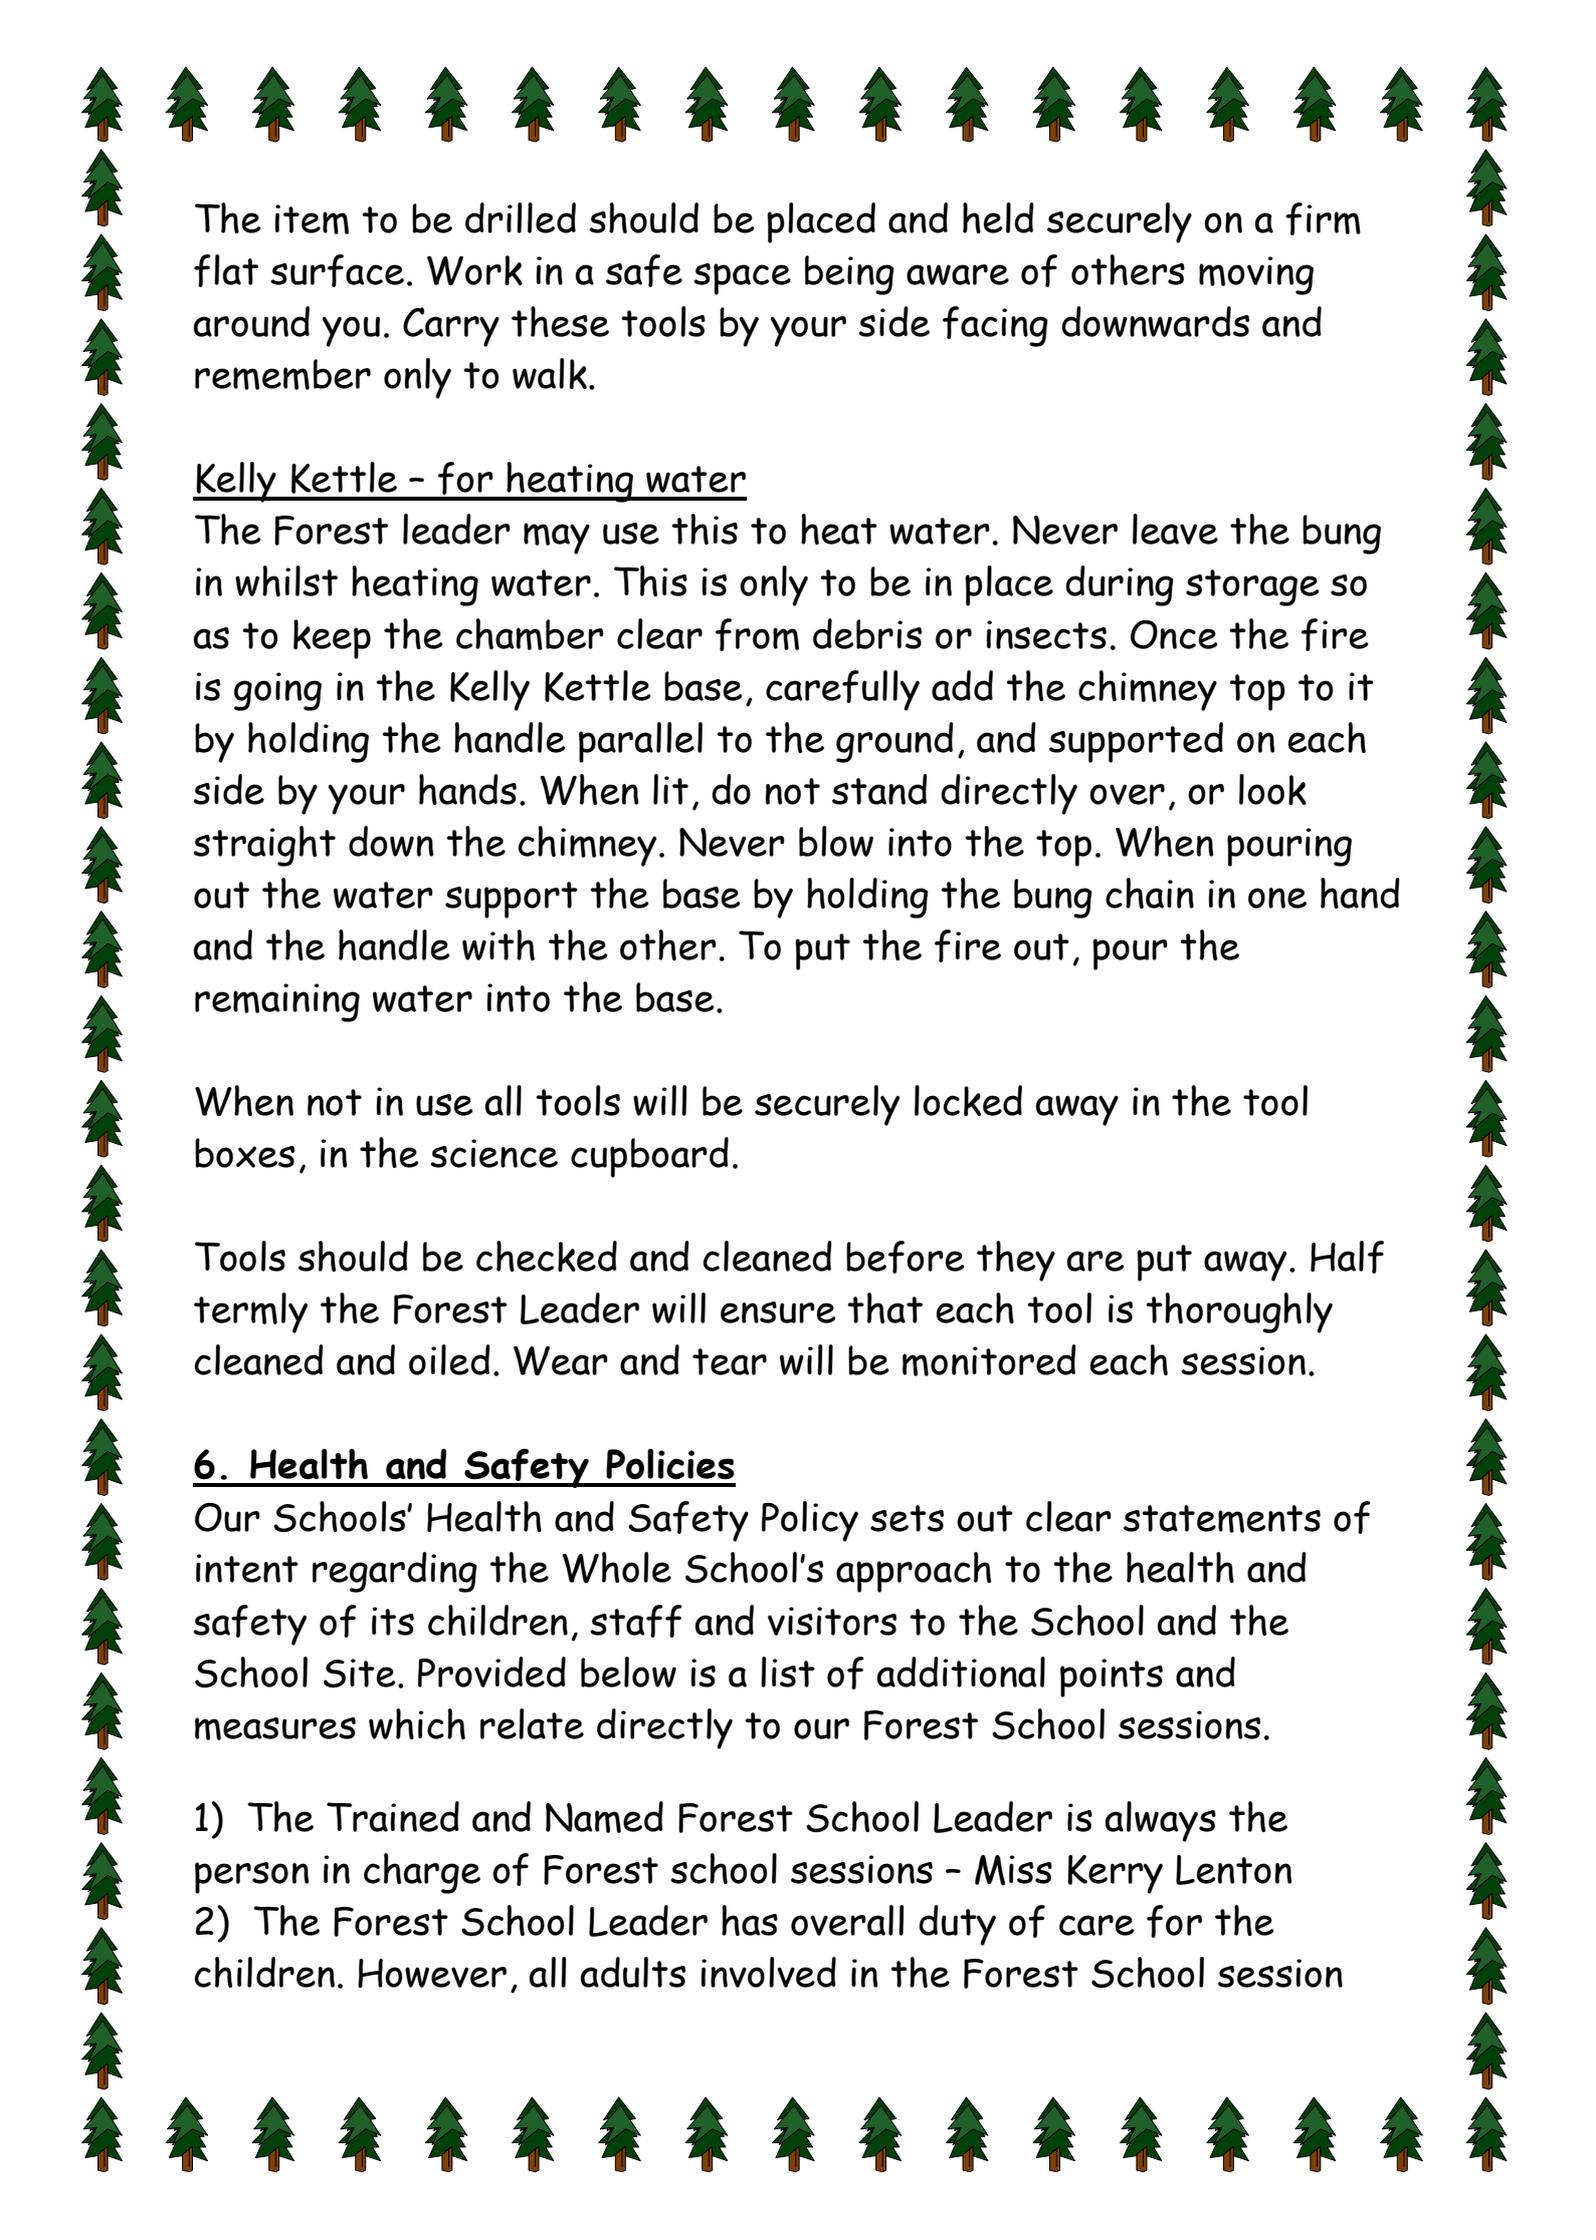

Each tool type is kept in their own suitable containers, many of which are also lockable. Children must never be allowed to help themselves and will always have adult supervision when collecting, transporting and using tools. Tools are only used for a specific purpose. All adults should model correct and safe tool use, storage and transportation at all times. When using a tool, they are used well away from others in the group ensuring that others are aware that a tool is in use. Only walking is permitted when transporting a tool. Personal protective equipment must be worn in accordance with the tools risk assessment.

Potato Peelers (3-7yrs) and Knives (8yrs+) - for peeling or sharpening sticks (whittling) A ratio of 1 adult to 2 children will be observed. This tool must be used seated on a log with elbows placed upon knees and using the tool in a downward motion between the legs. When carrying peelers you must walk with them held down by your side. Once a child is deemed to be competent by the forest leader they may be allowed to use a fixed blade knife to whittle (older children only). The same rules as above still apply.

Tools must be returned to the storage container when no longer in use.

Bow Saws - for cross cutting wood up to 12cm diameter Children may be taught how to use a bow saw with 1:1 supervision, or with a 'buddy' helping in a 'push-pull' fashion. Adults must always supervise closely and should place their hand (gloved) between the child's hand and that of the saw blade. The saw blade must be covered when not in use. When being carried the bow saw blade (in its' cover) should be pointing downwards, and to the back. When not in use (locked storage) blades should be loosened off by an adult.

Hand drills - for making holes

The item to be drilled should be placed and held securely on a firm flat surface. Work in a safe space being aware of others moving around you. Carry these tools by your side facing downwards and remember only to walk.

Kelly Kettle - for heating water

The Forest leader may use this to heat water. Never leave the bung in whilst heating water. This is only to be in place during storage so as to keep the chamber clear from debris or insects. Once the fire is going in the Kelly Kettle base, carefully add the chimney top to it by holding the handle parallel to the ground, and supported on each side by your hands. When lit, do not stand directly over, or look straight down the chimney. Never blow into the top. When pouring out the water support the base by holding the bung chain in one hand and the handle with the other. To put the fire out, pour the remaining water into the base.

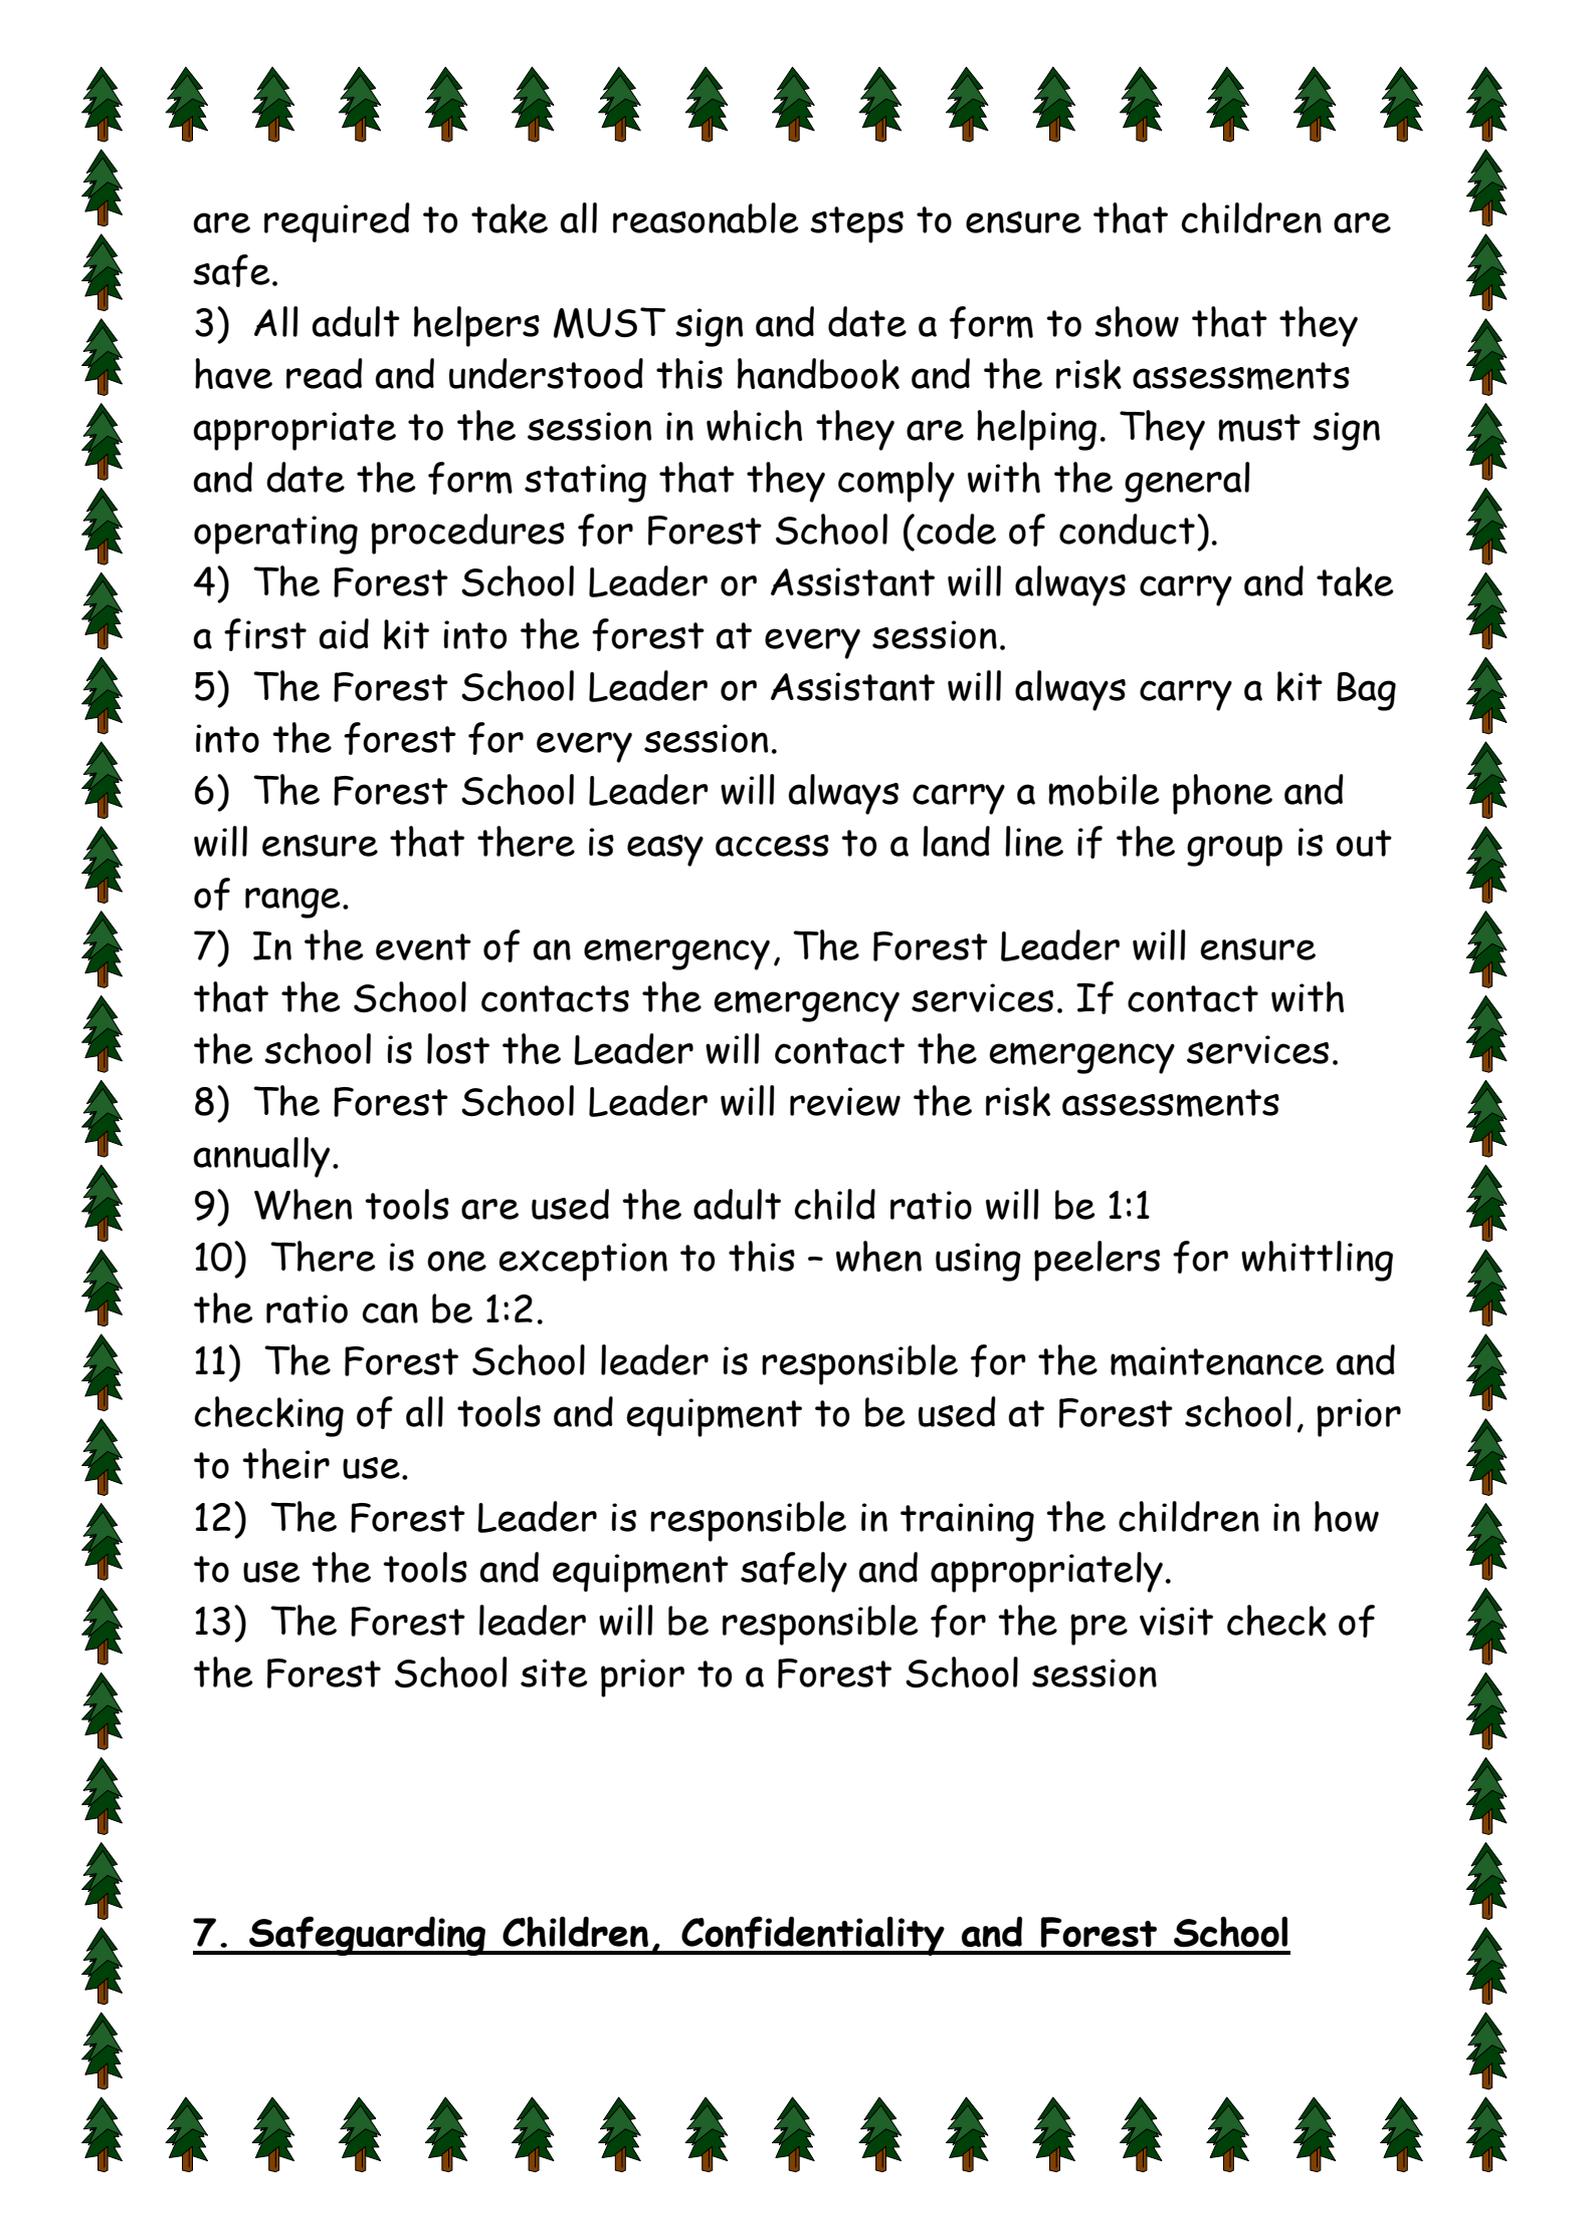

When not in use all tools will be securely locked away in the tool boxes, in the science cupboard.

Tools should be checked and cleaned before they are put away. Half termly the Forest Leader will ensure that each tool is thoroughly cleaned and oiled. Wear and tear will be monitored each session.

6. Health and Safety Policies

Our Schools' Health and Safety Policy sets out clear statements of intent regarding the Whole School's approach to the health and safety of its children, staff and visitors to the School and the School Site. Provided below is a list of additional points and measures which relate directly to our Forest School sessions.

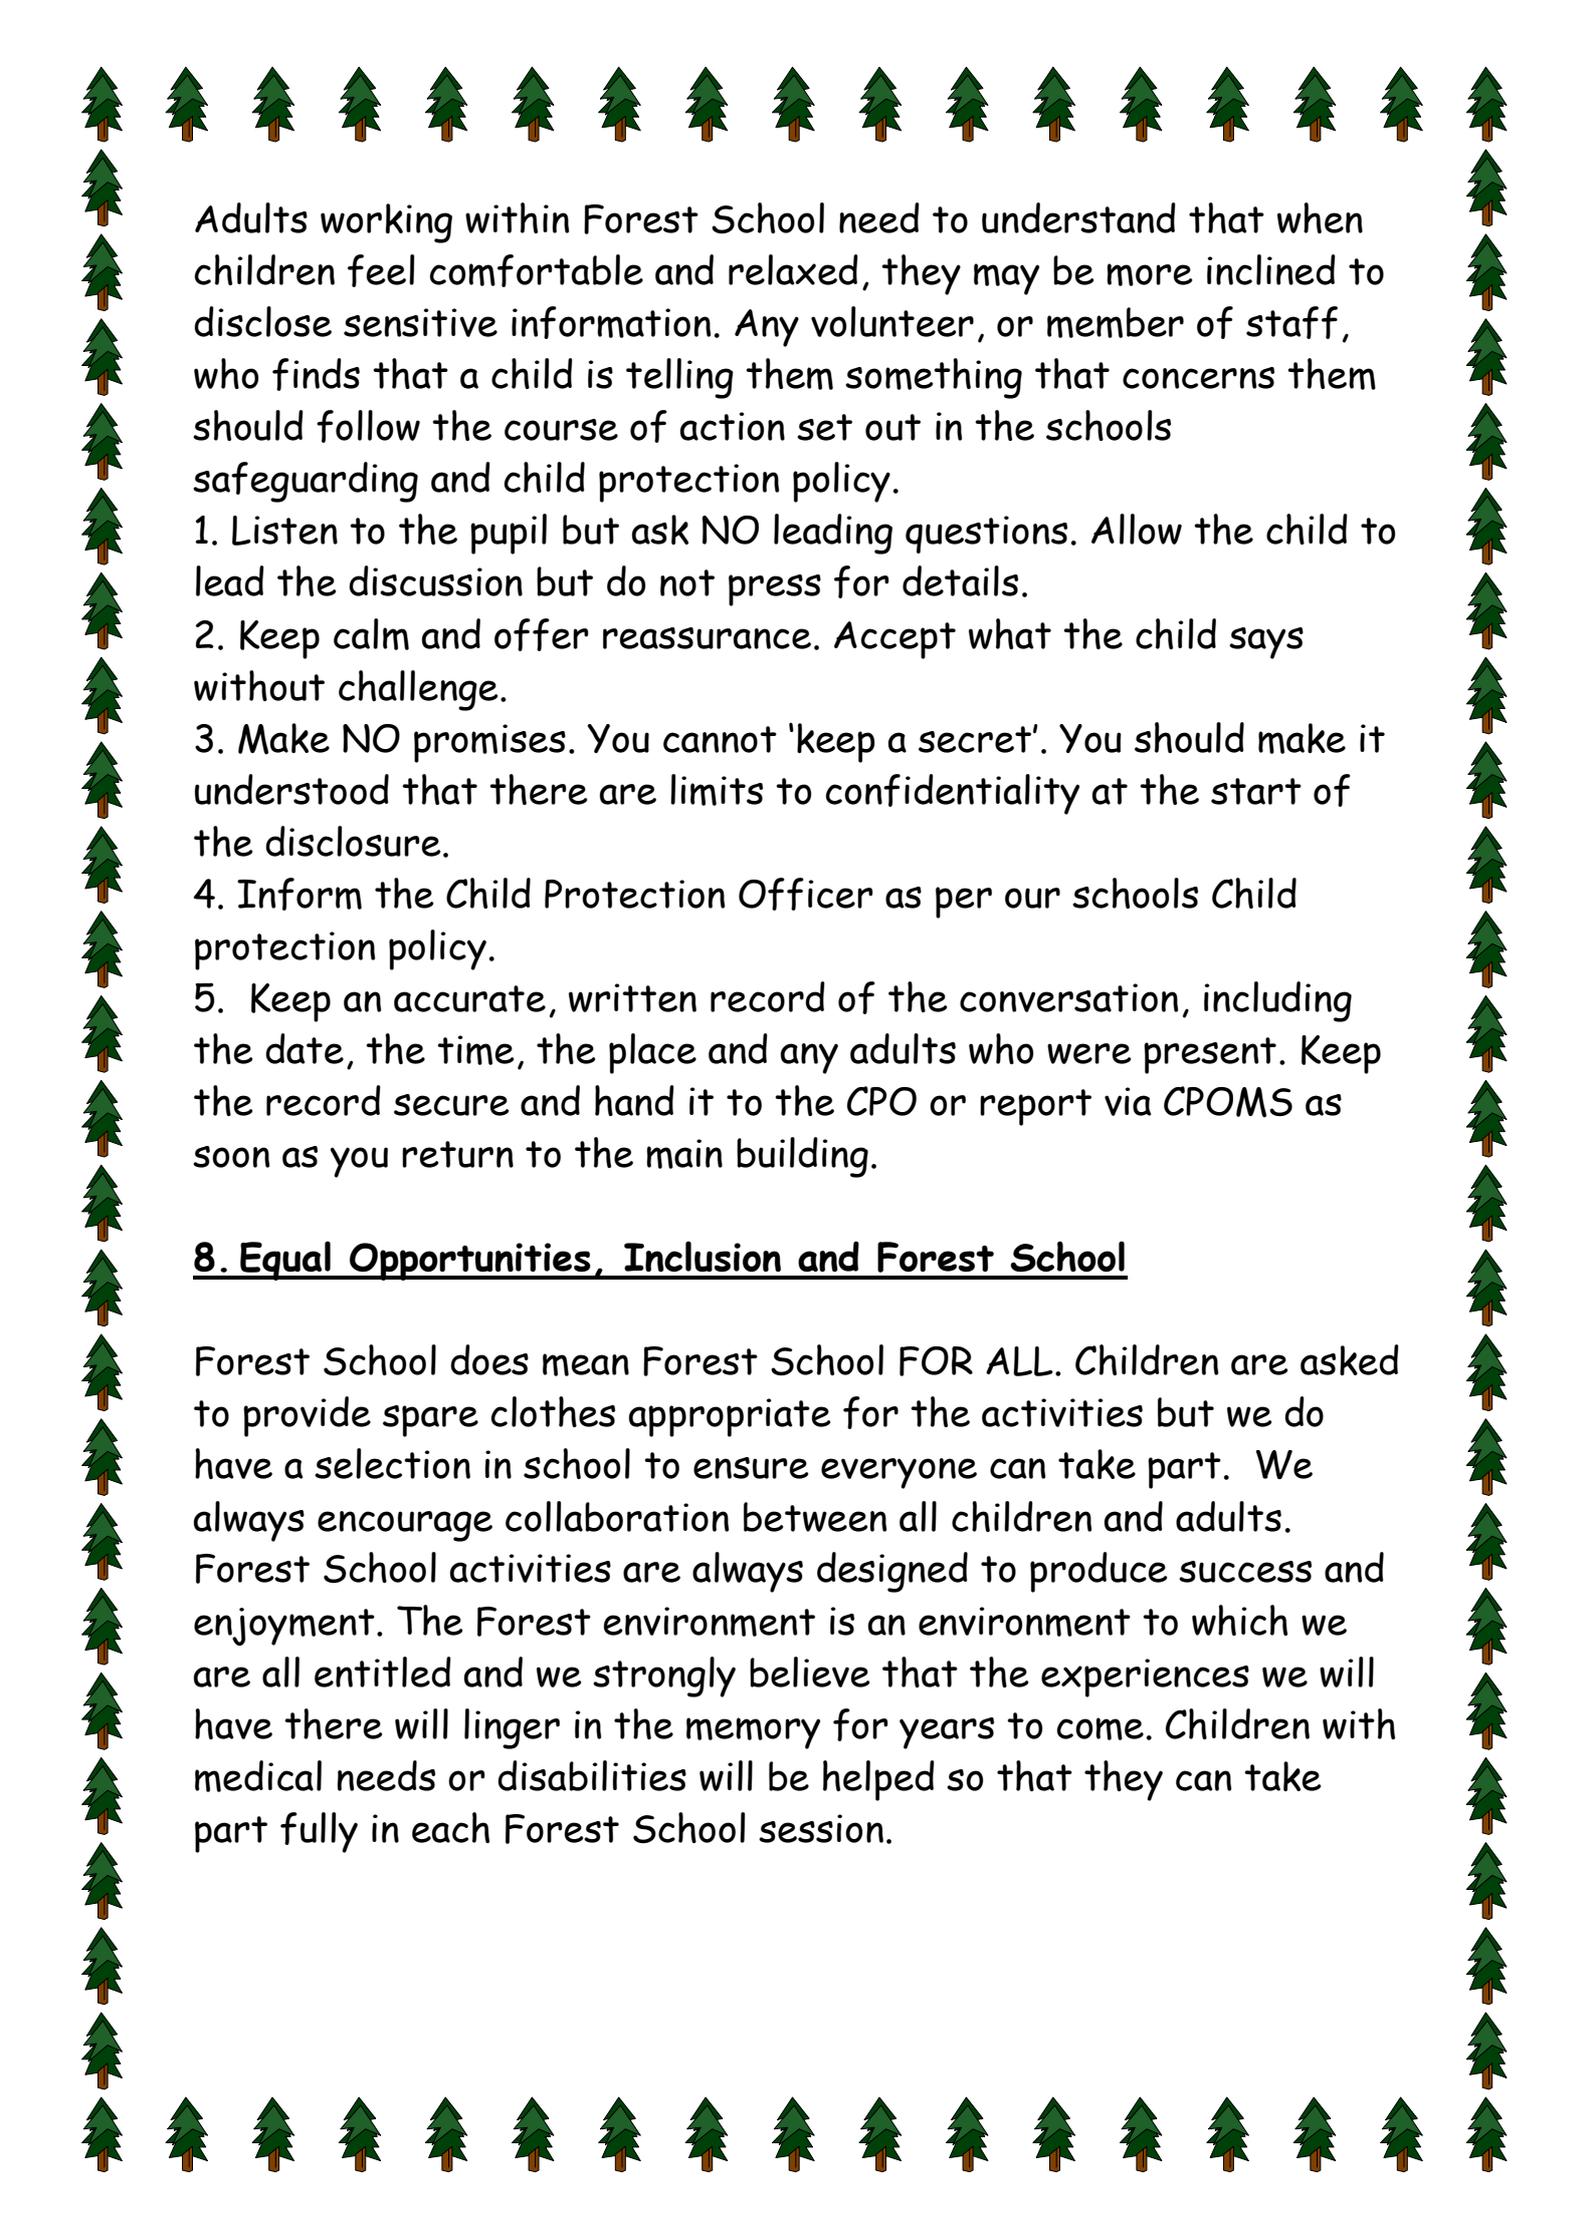

- 1) The Trained and Named Forest School Leader is always the person in charge of Forest school sessions - Miss Kerry Lenton
- 2) The Forest School Leader has overall duty of care for the children. However, all adults involved in the Forest School session

are required to take all reasonable steps to ensure that children are safe.

- 3) All adult helpers **MUST** sign and date a form to show that they have read and understood this handbook and the risk assessments appropriate to the session in which they are helping. They must sign and date the form stating that they comply with the general operating procedures for Forest School (code of conduct).
- 4) The Forest School Leader or Assistant will always carry and take a first aid kit into the forest at every session.
- 5) The Forest School Leader or Assistant will always carry a kit Bag into the forest for every session.
- 6) The Forest School Leader will always carry a mobile phone and will ensure that there is easy access to a land line if the group is out of range.
- 7) In the event of an emergency, The Forest Leader will ensure that the School contacts the emergency services. If contact with the school is lost the Leader will contact the emergency services.
- 8) The Forest School Leader will review the risk assessments annually.
- 9) When tools are used the adult child ratio will be 1:1
- 10) There is one exception to this - when using peelers for whittling the ratio can be 1:2.
- 11) The Forest School leader is responsible for the maintenance and checking of all tools and equipment to be used at Forest school, prior to their use.
- 12) The Forest Leader is responsible in training the children in how to use the tools and equipment safely and appropriately.
- 13) The Forest leader will be responsible for the pre visit check of the Forest School site prior to a Forest School session

7. Safeguarding Children, Confidentiality and Forest School

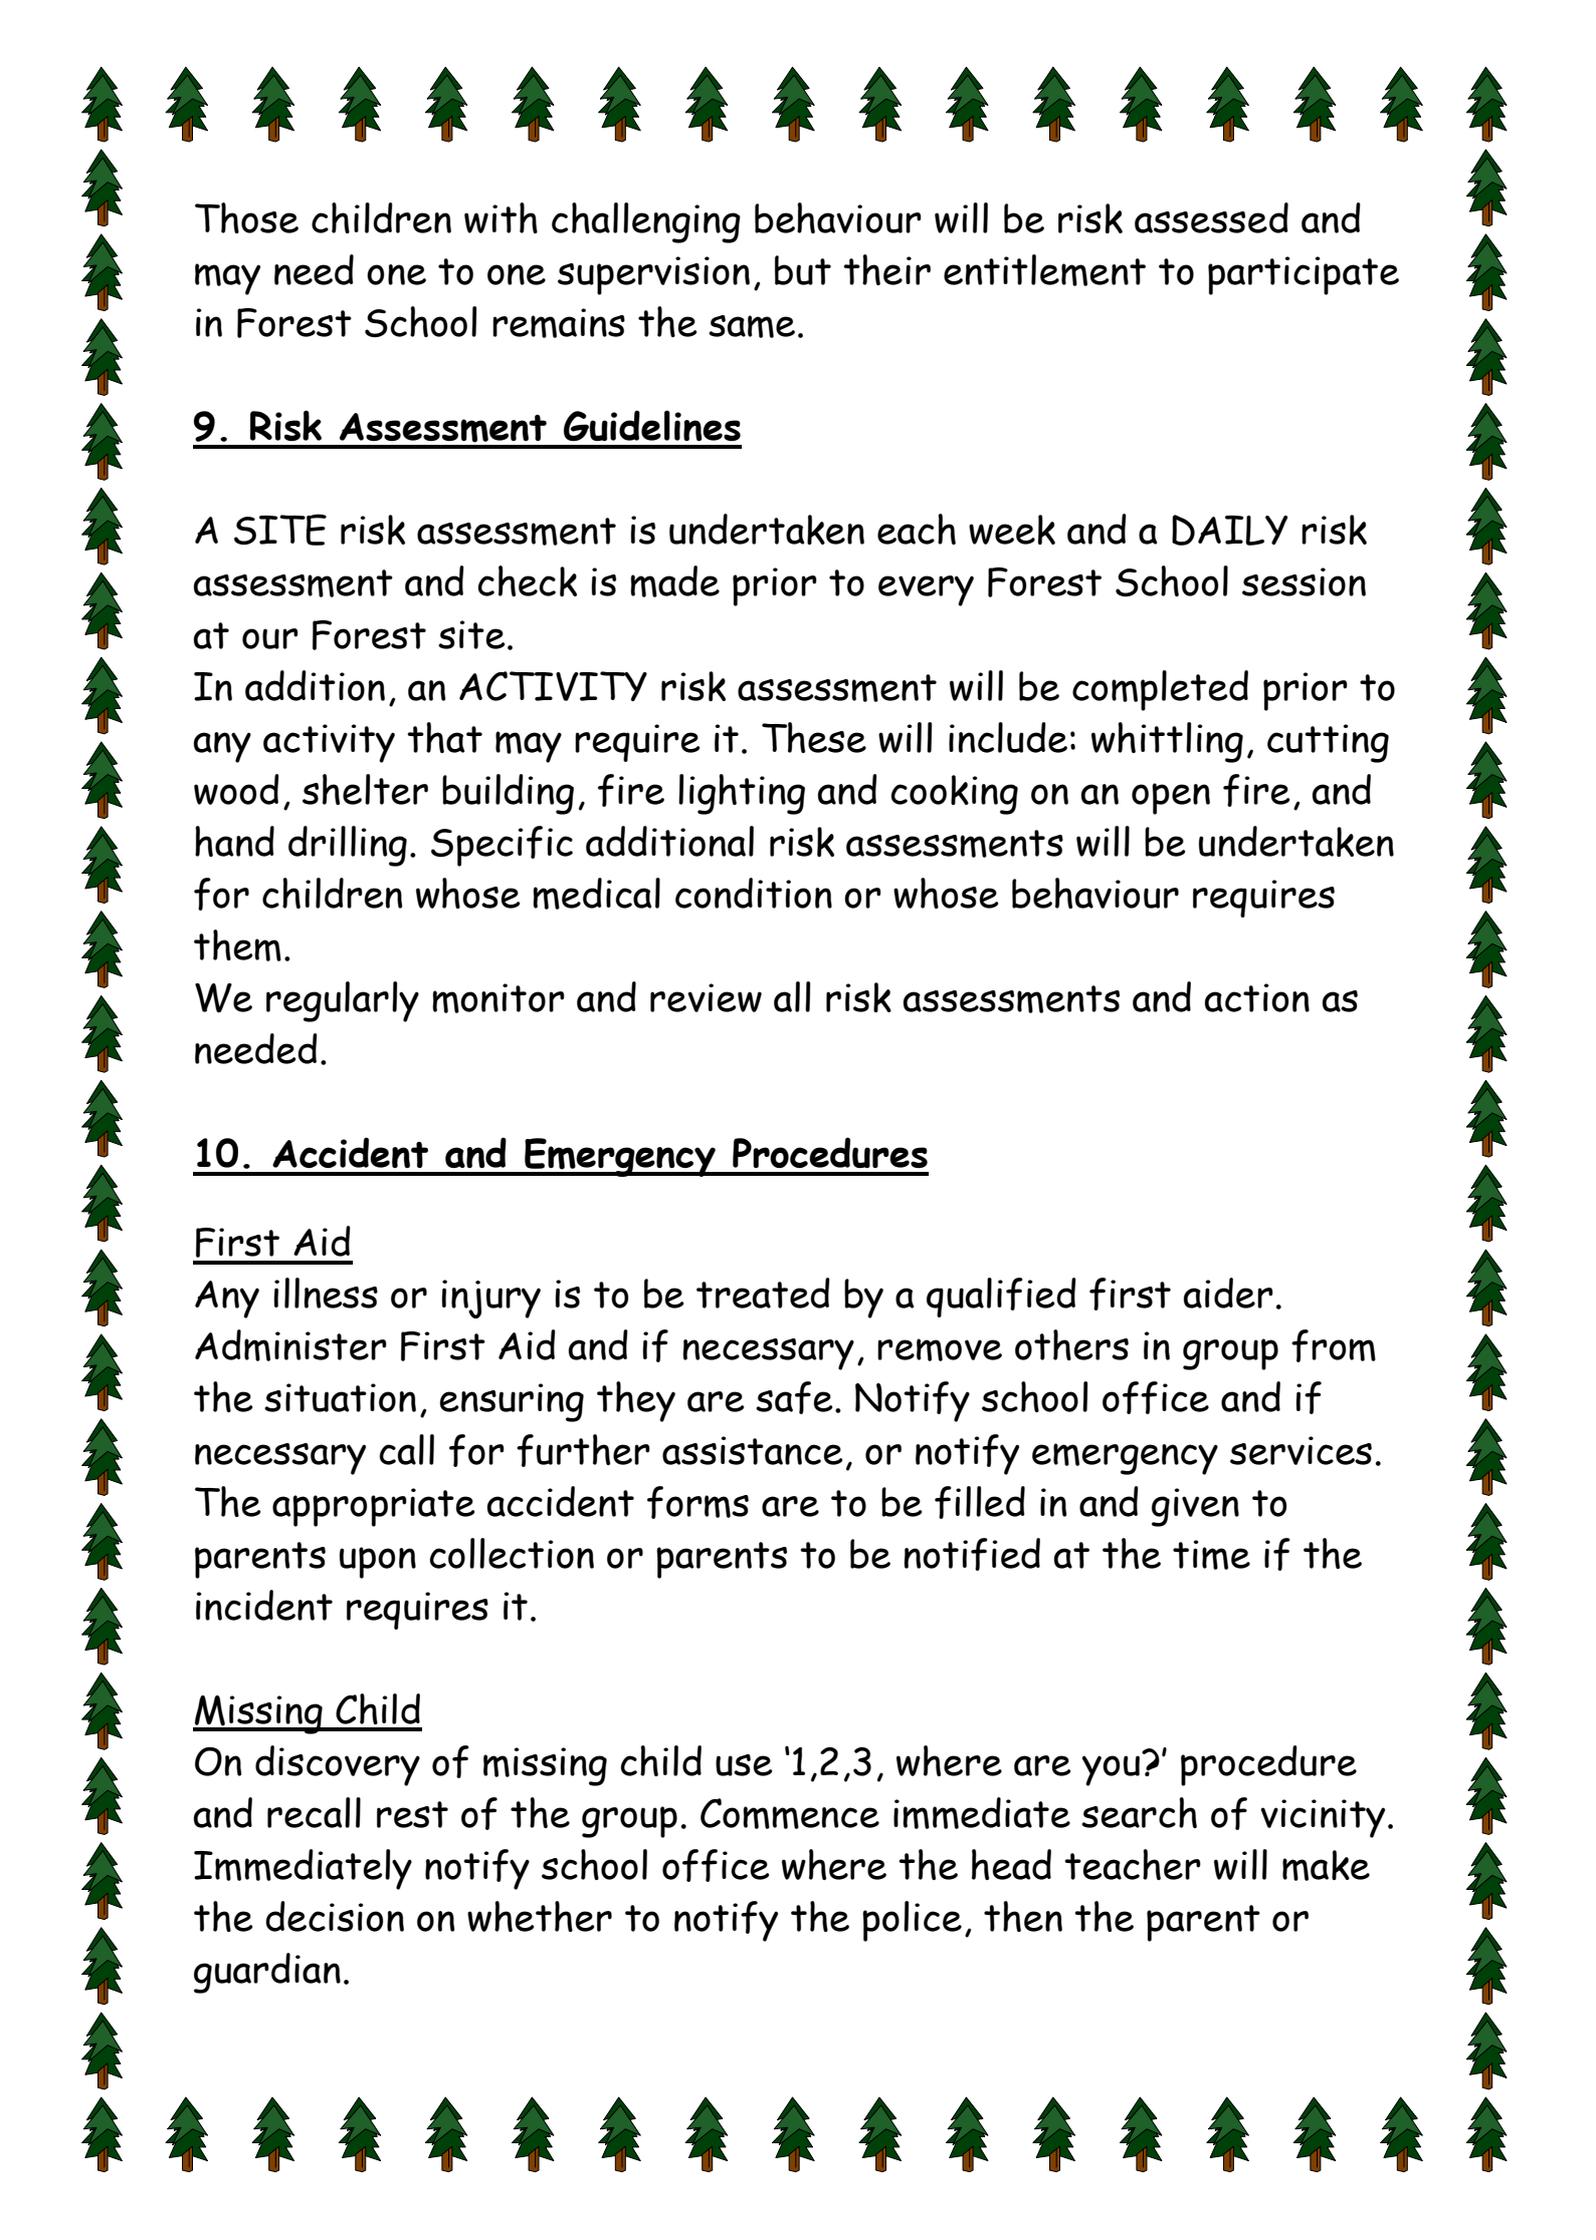

Adults working within Forest School need to understand that when children feel comfortable and relaxed, they may be more inclined to disclose sensitive information. Any volunteer, or member of staff, who finds that a child is telling them something that concerns them should follow the course of action set out in the schools safeguarding and child protection policy.

1. Listen to the pupil but ask NO leading questions. Allow the child to lead the discussion but do not press for details.
2. Keep calm and offer reassurance. Accept what the child says without challenge.
3. Make NO promises. You cannot 'keep a secret'. You should make it understood that there are limits to confidentiality at the start of the disclosure.
4. Inform the Child Protection Officer as per our schools Child protection policy.
5. Keep an accurate, written record of the conversation, including the date, the time, the place and any adults who were present. Keep the record secure and hand it to the CPO or report via CPOMS as soon as you return to the main building.

8. Equal Opportunities, Inclusion and Forest School

Forest School does mean Forest School FOR ALL. Children are asked to provide spare clothes appropriate for the activities but we do have a selection in school to ensure everyone can take part. We always encourage collaboration between all children and adults. Forest School activities are always designed to produce success and enjoyment. The Forest environment is an environment to which we are all entitled and we strongly believe that the experiences we will have there will linger in the memory for years to come. Children with medical needs or disabilities will be helped so that they can take part fully in each Forest School session.

Those children with challenging behaviour will be risk assessed and may need one to one supervision, but their entitlement to participate in Forest School remains the same.

9. Risk Assessment Guidelines

A SITE risk assessment is undertaken each week and a DAILY risk assessment and check is made prior to every Forest School session at our Forest site.

In addition, an ACTIVITY risk assessment will be completed prior to any activity that may require it. These will include: whittling, cutting wood, shelter building, fire lighting and cooking on an open fire, and hand drilling. Specific additional risk assessments will be undertaken for children whose medical condition or whose behaviour requires them.

We regularly monitor and review all risk assessments and action as needed.

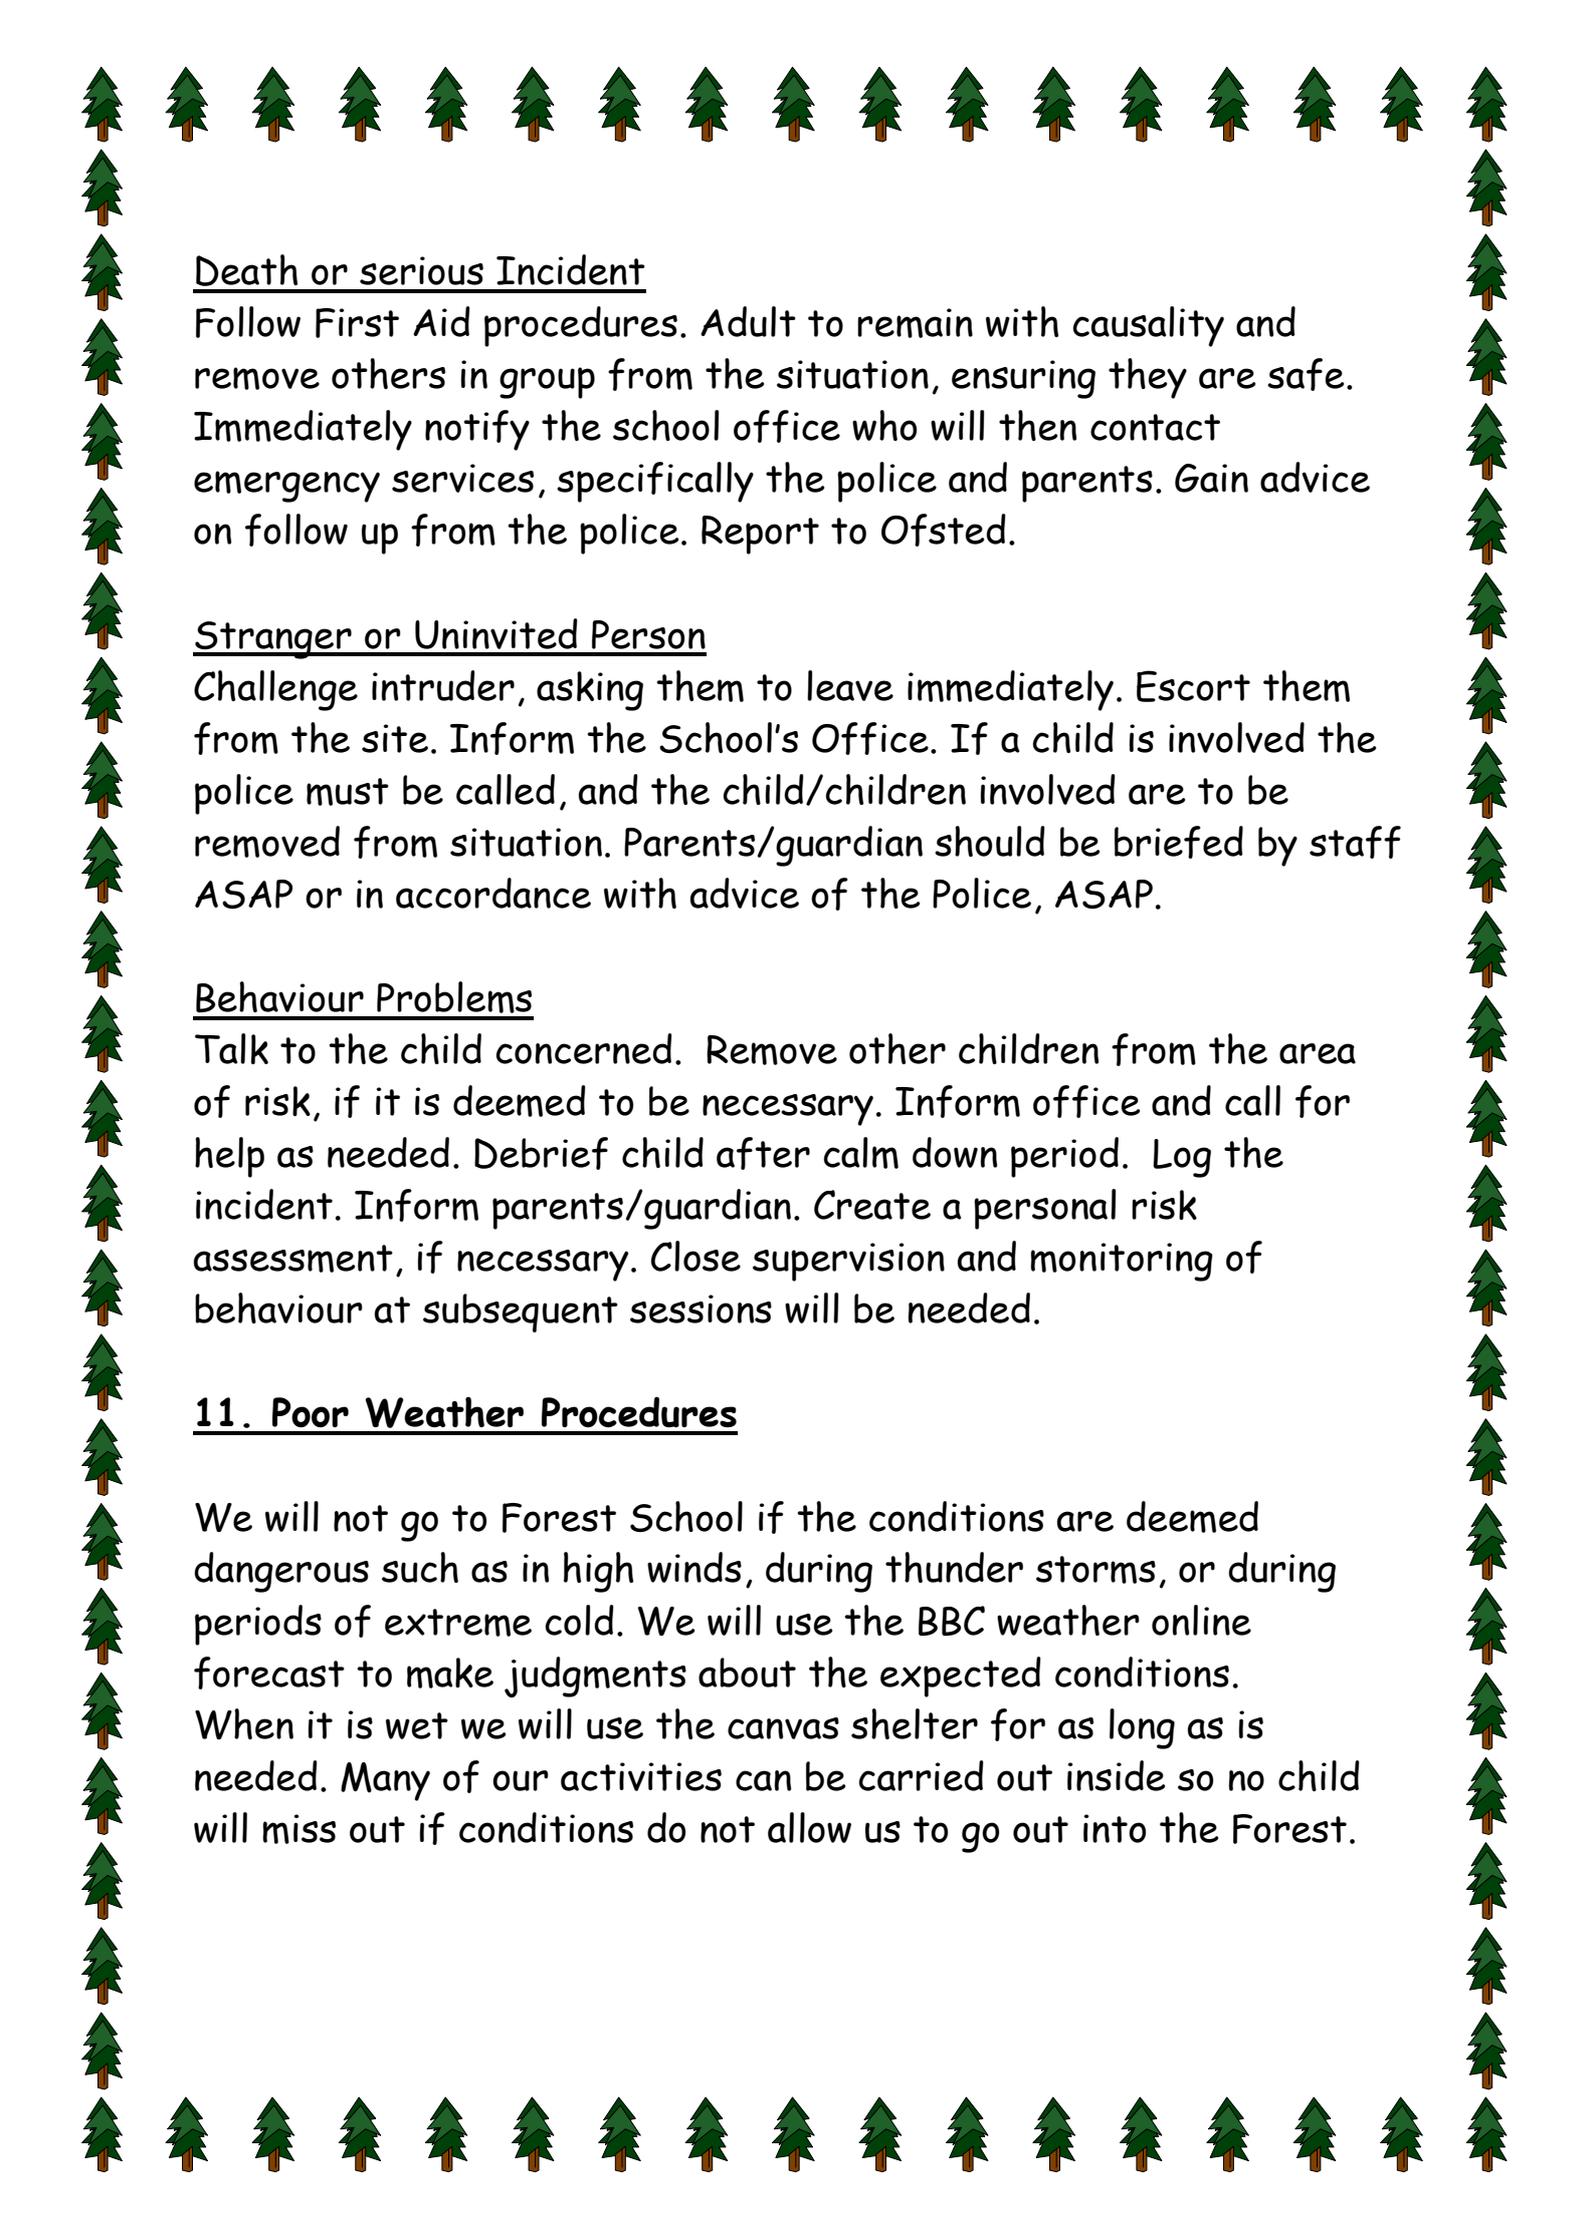

10. Accident and Emergency Procedures

First Aid

Any illness or injury is to be treated by a qualified first aider. Administer First Aid and if necessary, remove others in group from the situation, ensuring they are safe. Notify school office and if necessary call for further assistance, or notify emergency services. The appropriate accident forms are to be filled in and given to parents upon collection or parents to be notified at the time if the incident requires it.

Missing Child

On discovery of missing child use '1,2,3, where are you?' procedure and recall rest of the group. Commence immediate search of vicinity. Immediately notify school office where the head teacher will make the decision on whether to notify the police, then the parent or guardian.

Death or serious Incident

Follow First Aid procedures. Adult to remain with causality and remove others in group from the situation, ensuring they are safe. Immediately notify the school office who will then contact emergency services, specifically the police and parents. Gain advice on follow up from the police. Report to Ofsted.

Stranger or Uninvited Person

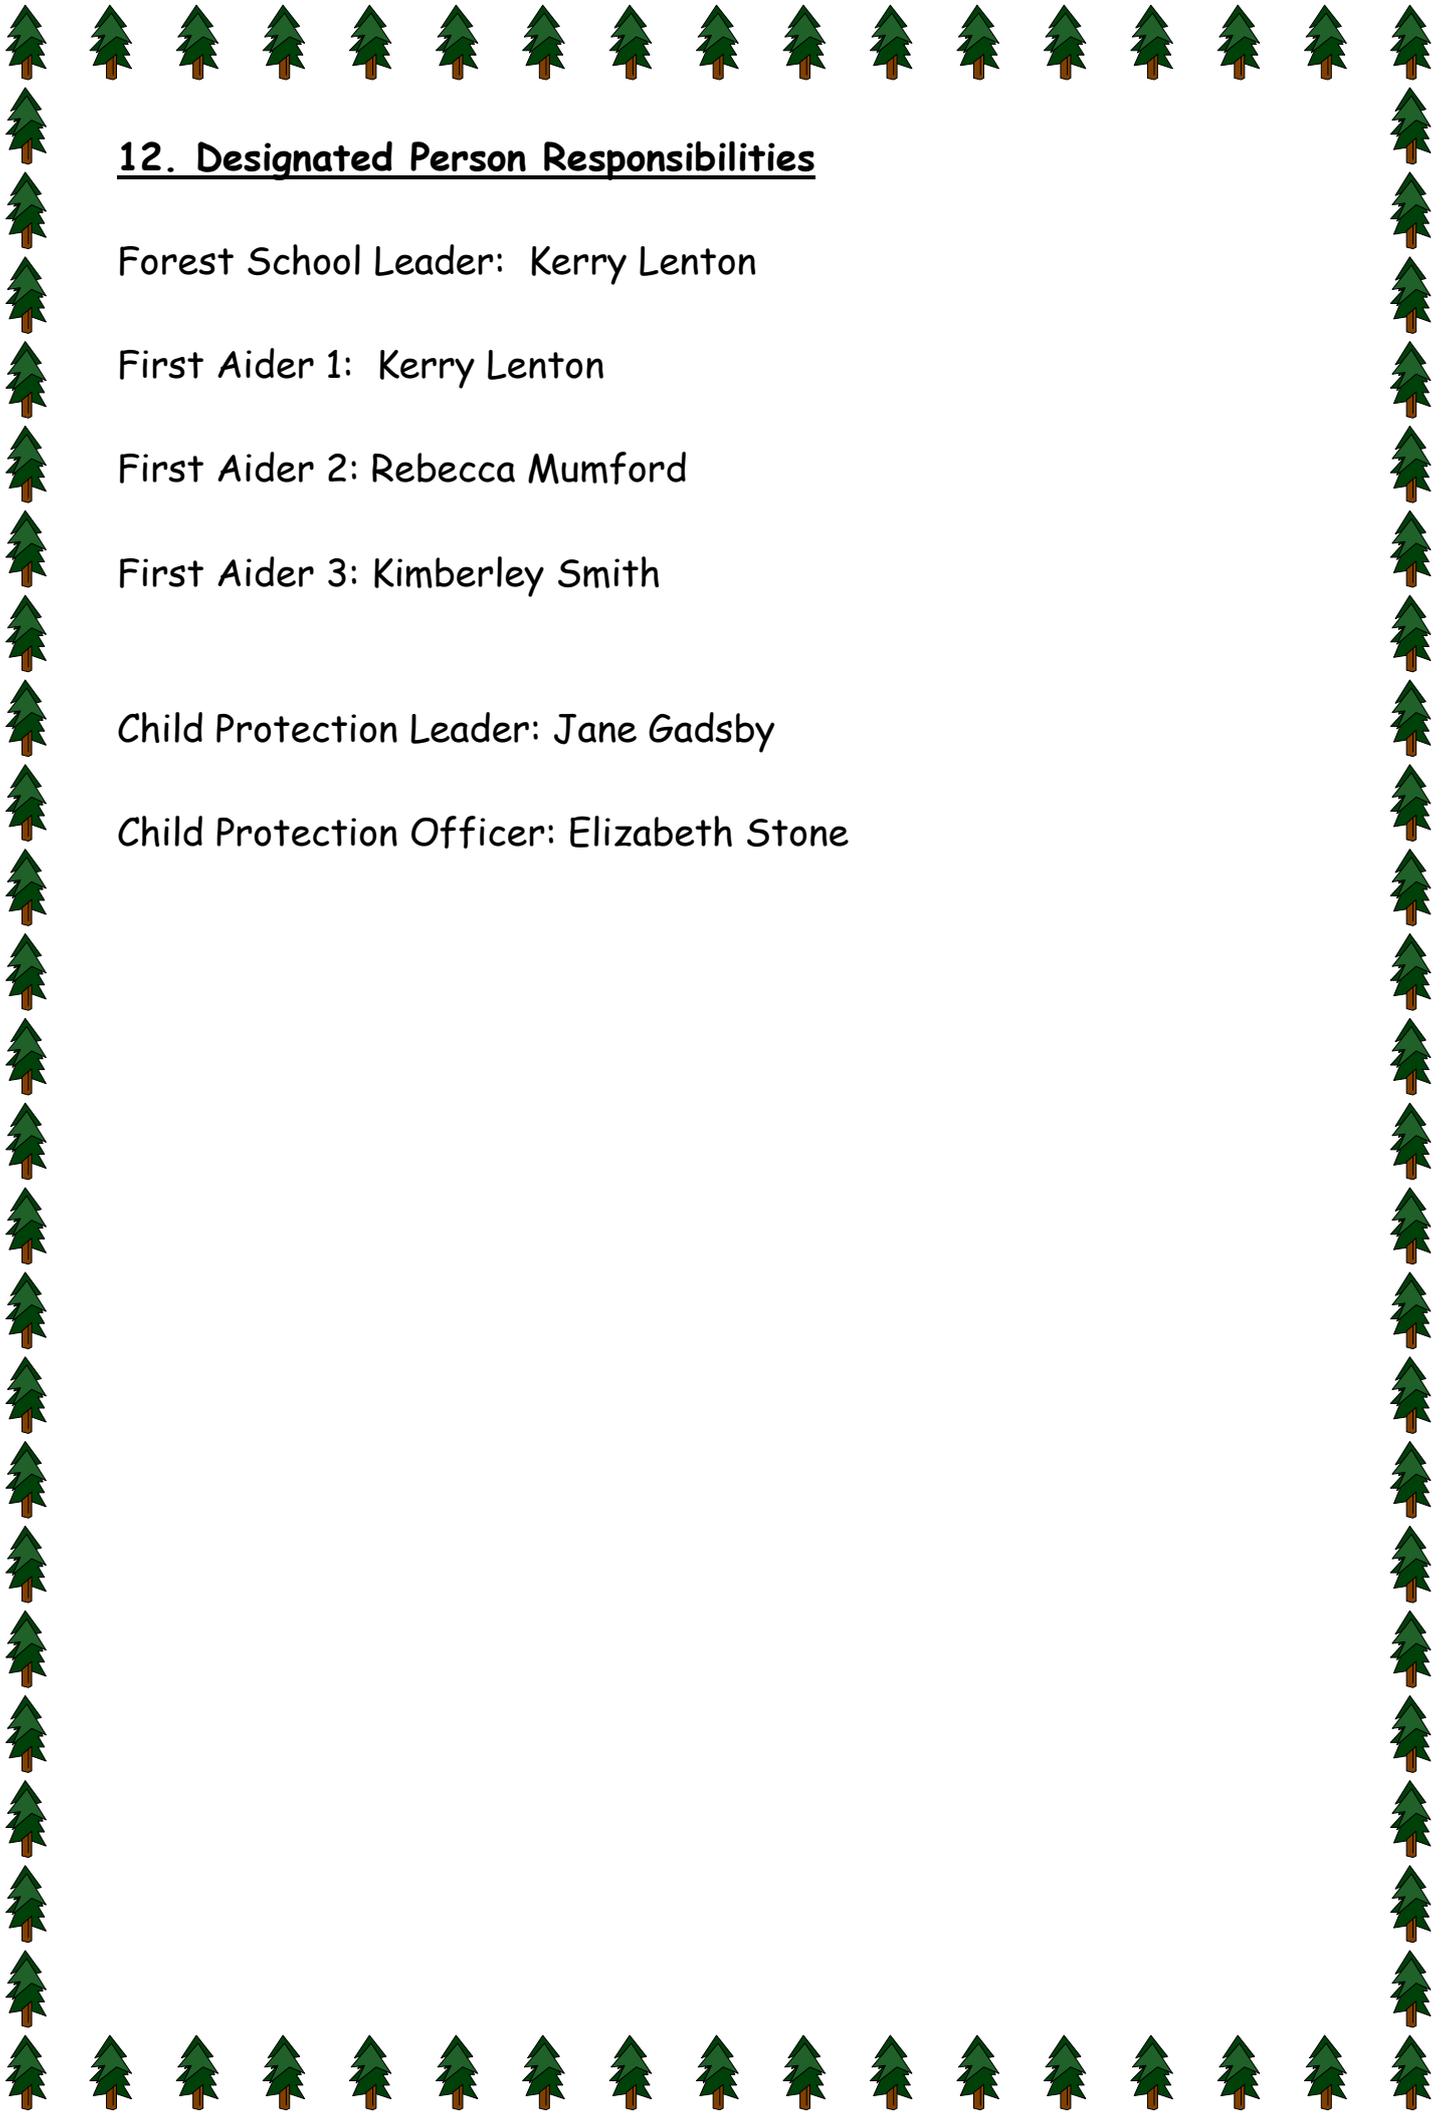

Challenge intruder, asking them to leave immediately. Escort them from the site. Inform the School's Office. If a child is involved the police must be called, and the child/children involved are to be removed from situation. Parents/guardian should be briefed by staff ASAP or in accordance with advice of the Police, ASAP.

Behaviour Problems

Talk to the child concerned. Remove other children from the area of risk, if it is deemed to be necessary. Inform office and call for help as needed. Debrief child after calm down period. Log the incident. Inform parents/guardian. Create a personal risk assessment, if necessary. Close supervision and monitoring of behaviour at subsequent sessions will be needed.

11. Poor Weather Procedures

We will not go to Forest School if the conditions are deemed dangerous such as in high winds, during thunder storms, or during periods of extreme cold. We will use the BBC weather online forecast to make judgments about the expected conditions. When it is wet we will use the canvas shelter for as long as is needed. Many of our activities can be carried out inside so no child will miss out if conditions do not allow us to go out into the Forest.

A decorative border of green pine trees surrounds the text. There are 15 trees in a horizontal row at the top and bottom, and 20 trees in a vertical column on the left and right sides.

12. Designated Person Responsibilities

Forest School Leader: Kerry Lenton

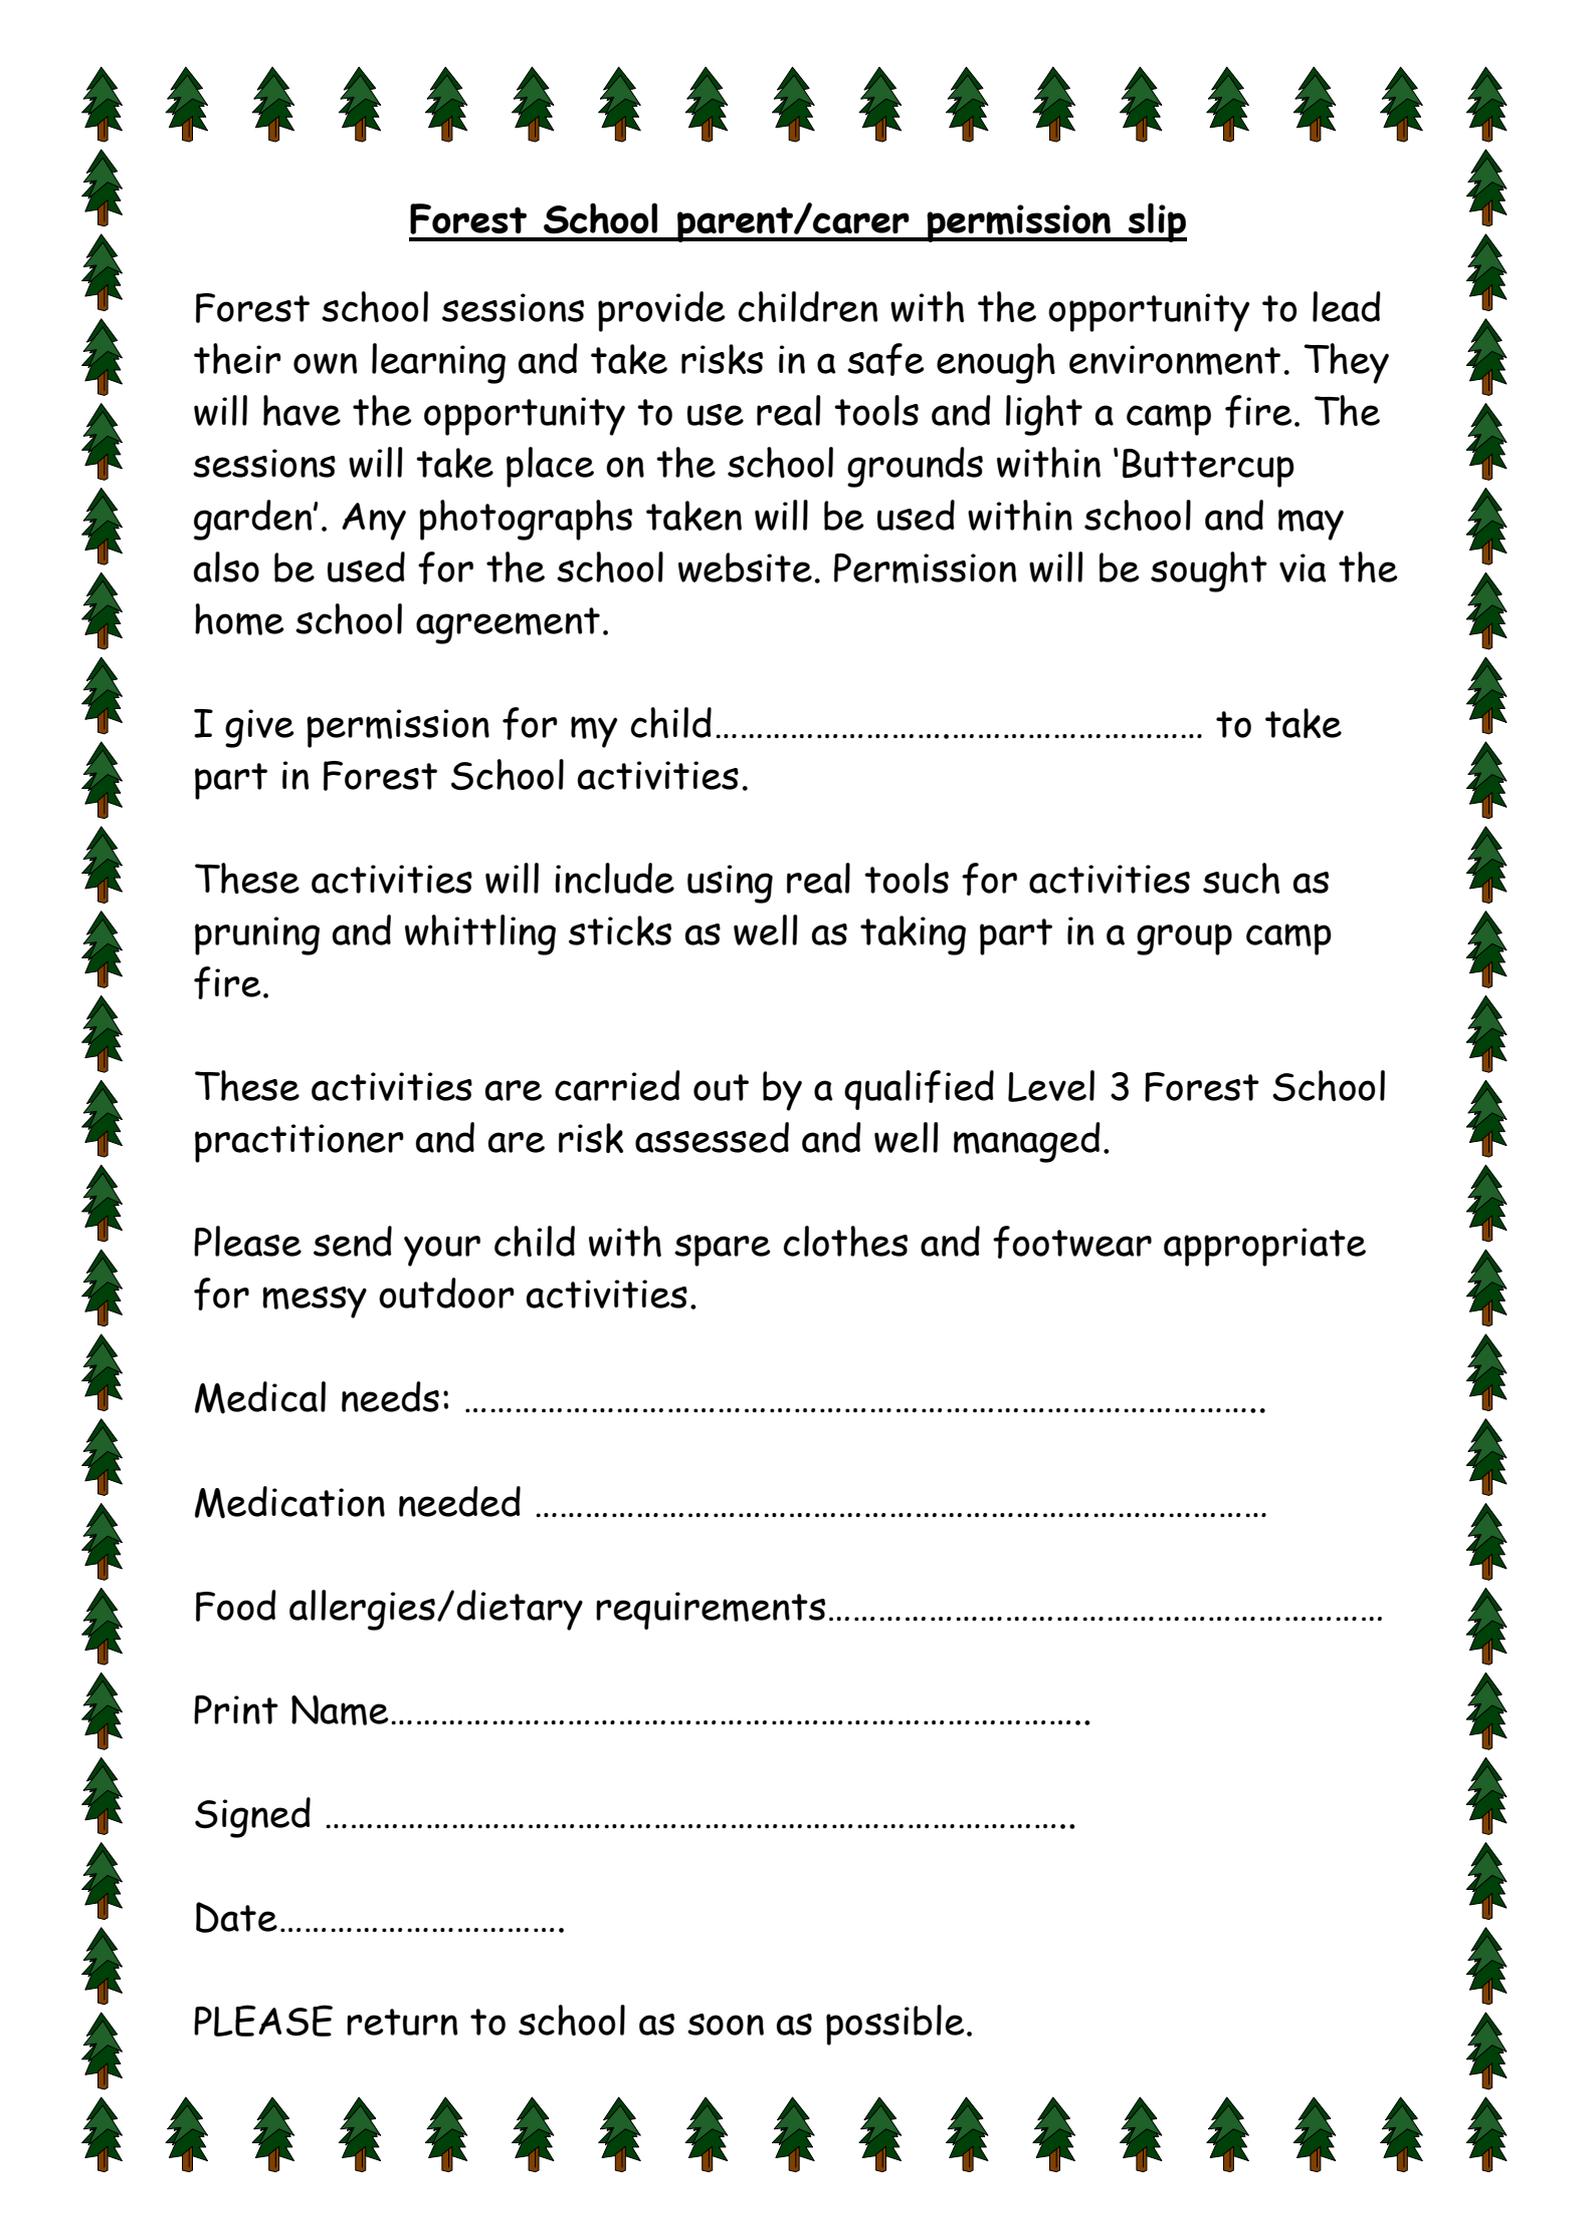

First Aider 1: Kerry Lenton

First Aider 2: Rebecca Mumford

First Aider 3: Kimberley Smith

Child Protection Leader: Jane Gadsby

Child Protection Officer: Elizabeth Stone

A decorative border of small green pine trees with brown trunks surrounds the text. There are 15 trees in each of the four corners and a row of 15 trees along the top edge.

Forest School parent/carer permission slip

Forest school sessions provide children with the opportunity to lead their own learning and take risks in a safe enough environment. They will have the opportunity to use real tools and light a camp fire. The sessions will take place on the school grounds within 'Buttercup garden'. Any photographs taken will be used within school and may also be used for the school website. Permission will be sought via the home school agreement.

I give permission for my child..... to take part in Forest School activities.

These activities will include using real tools for activities such as pruning and whittling sticks as well as taking part in a group camp fire.

These activities are carried out by a qualified Level 3 Forest School practitioner and are risk assessed and well managed.

Please send your child with spare clothes and footwear appropriate for messy outdoor activities.

Medical needs:

Medication needed

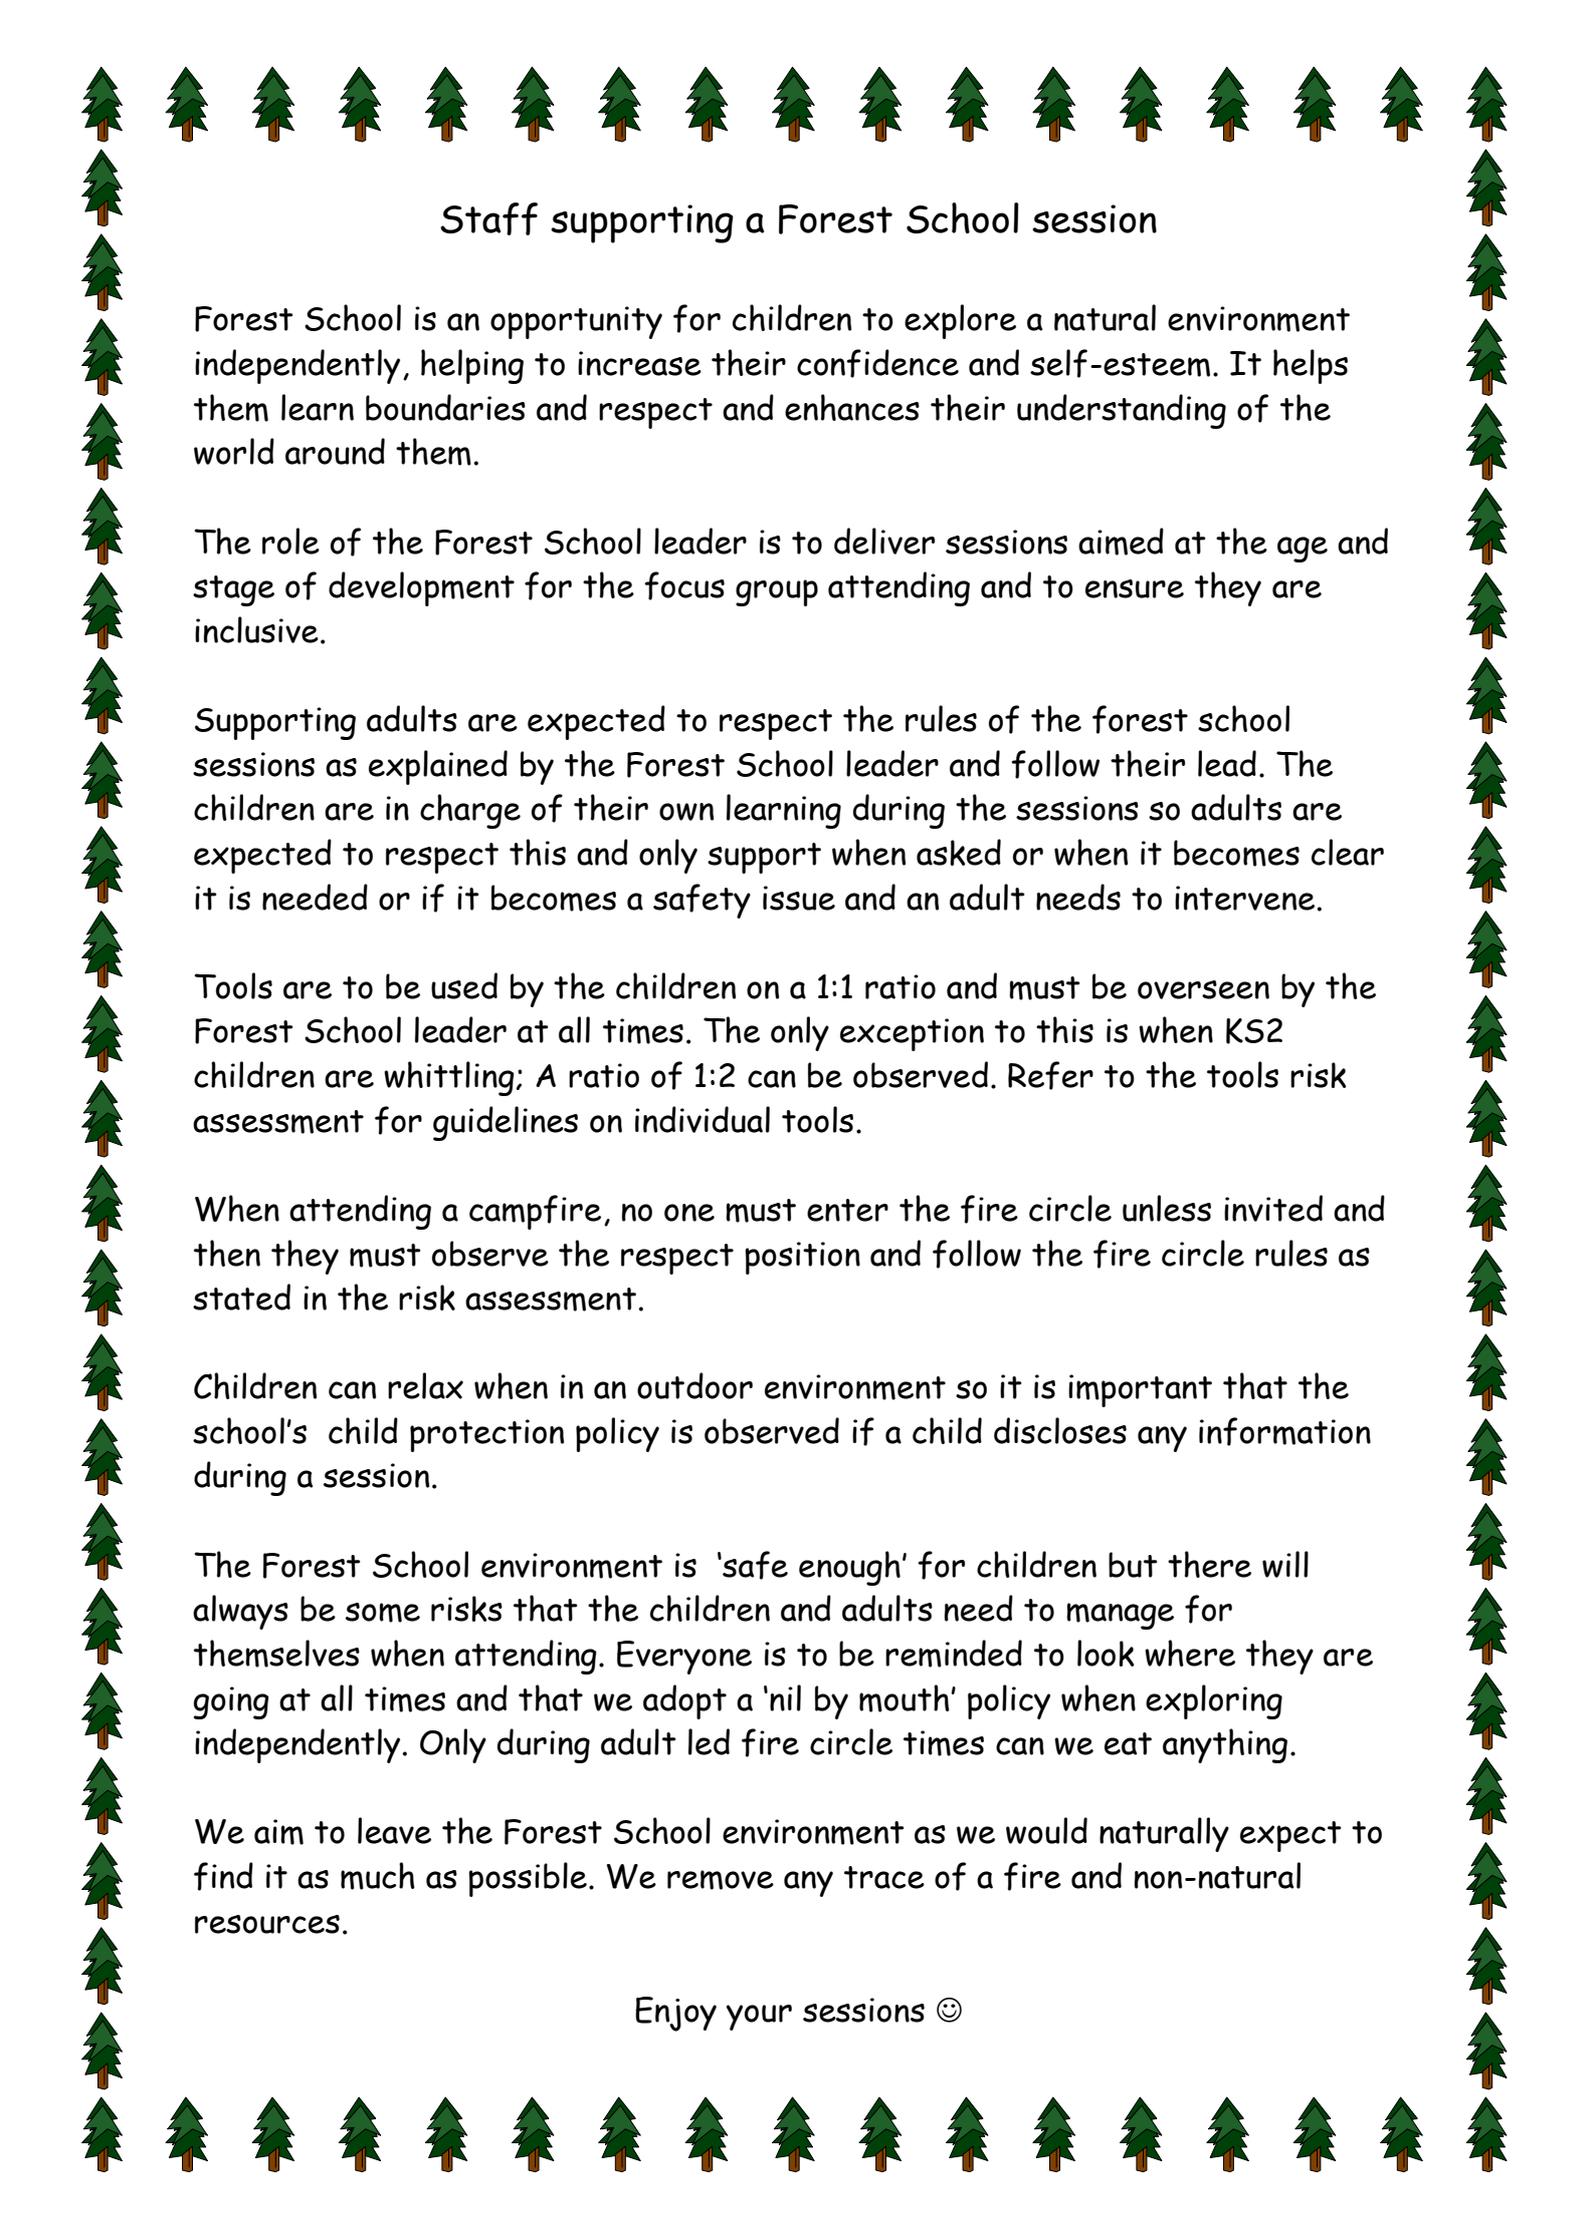

Food allergies/dietary requirements.....

Print Name.....

Signed

Date.....

PLEASE return to school as soon as possible.

A decorative border of small green pine trees with brown trunks surrounds the text. The trees are arranged in a grid-like pattern, with a row of 15 trees at the top, a row of 15 trees at the bottom, and vertical columns of trees on the left and right sides.

Staff supporting a Forest School session

Forest School is an opportunity for children to explore a natural environment independently, helping to increase their confidence and self-esteem. It helps them learn boundaries and respect and enhances their understanding of the world around them.

The role of the Forest School leader is to deliver sessions aimed at the age and stage of development for the focus group attending and to ensure they are inclusive.

Supporting adults are expected to respect the rules of the forest school sessions as explained by the Forest School leader and follow their lead. The children are in charge of their own learning during the sessions so adults are expected to respect this and only support when asked or when it becomes clear it is needed or if it becomes a safety issue and an adult needs to intervene.

Tools are to be used by the children on a 1:1 ratio and must be overseen by the Forest School leader at all times. The only exception to this is when KS2 children are whittling; A ratio of 1:2 can be observed. Refer to the tools risk assessment for guidelines on individual tools.

When attending a campfire, no one must enter the fire circle unless invited and then they must observe the respect position and follow the fire circle rules as stated in the risk assessment.

Children can relax when in an outdoor environment so it is important that the school's child protection policy is observed if a child discloses any information during a session.

The Forest School environment is 'safe enough' for children but there will always be some risks that the children and adults need to manage for themselves when attending. Everyone is to be reminded to look where they are going at all times and that we adopt a 'nil by mouth' policy when exploring independently. Only during adult led fire circle times can we eat anything.

We aim to leave the Forest School environment as we would naturally expect to find it as much as possible. We remove any trace of a fire and non-natural resources.

Enjoy your sessions ☺
