

Welcome to Autumn 1

MATHS

We will be focusing on place value within the first term and learning a lot about the numbers up to 10. Then, we will move on to looking at shape using basic Mathematical vocabulary.

At home, please continue to practice on Numbots, counting regularly with your child, pointing out the shape of different things and practising writing numbers if you can.

ENGLISH

We will be writing a various texts based on a book by Oliver Jeffers called Lost and Found. We will mostly be learning about capital letters, full stops, finger spaces. Our writing outcomes will include: character descriptions, retellings, advice letters, instructions and a journey story.

At home, please ensure you are reading with you child every day and speaking with them about the book they are reading. Then, sign your child's Monkey Book.

SCIENCE

This term in Science we will be learning all about the human body. The children will begin by identifying, naming, drawing and labelling the main parts of the body before exploring the five senses. They will find out how our eyes help us to see, how our ears detect sound, how our tongues taste different flavours, how our skin helps us to feel through touch and how our noses allow us to smell.

GEOGRAPHY

We will be learning about maps through looking at our school and local area. We will make our own messy maps and think about the routes that we take.

PE

Please make sure your child has PE kit in school. Our PE days are:
Monday - AM – year 1
Tuesday – PM - registration class

CURRICULUM

RE – Religious stories

PSHE – Me and my relationships

Computing - Online safety and staying safe

Art – Collage inspired by Khush Kali

Music – Pulse, rhythm and pitch

KEY DATES

19th September – Jeans for genes day
