<u>Introduction</u>

This year Stokes Wood Primary School had 481 pupils on roll, a few less than the previous year. At the end of the academic year, 20 children had an Educational Health Care Plan (EHCP), 48 children are classed as Special Educational Needs and Disability Support (SEND) and a further 46 children are being monitored within school. SEND support children are those who are:

- Receiving support from external agencies,
- Have a diagnosis of Special Education Needs and or Disability (SEND),
- Require a key worker/teaching assistant,
- And/or those who are having a specialised curriculum within school, such as those within the nurture group (Little Oaks), Superstars and the Designated Specialist Provision (DSP) for language and communication.

If a child is being monitored, they will be on at least one intervention at school and the teacher may have requested that the child has a School Learning Assessment and/or a Medical Assessment if these interventions are not giving the expected accelerated progress/catch-up.

Before these assessments happen, the teacher will ensure they are discussed with the parents/carers. During this meeting, parents/carers can give their opinions regarding their child's learning. This meeting may take place at parents' evenings or at another arranged meeting.

The teacher, and in some cases parents, may be asked to complete Strengths and Difficulties Questionnaires (SDQs) and/or other checklists, dependent on the area of difficulty. Letters to support parents making medical referrals may also be completed.

During this academic year Sarah Woods, the Special Needs and Disabilities Coordinator (SENDCo), has completed 12 full Learning Assessments (full learning assessments are completed for pupils where there is concern about their academic progress in more than one area of the curriculum). The results support staff in using the graduated response in relation to our SEND children.

Stokes Wood Primary School has embedded the Provision Map program. This system helps to effectively monitor and create a cohesive overview of our interventions each academic year.

CPOMS: Safeguarding and Child Protection Software for Schools

CPOMS has continued to be an effective and efficient way of recording and responding to incidents at Stokes Wood Primary School. The diagram below shows the number of incidents reported during the academic year (in each category).

Category	Incidents	Category	Incidents
Attendance	259	Medical	301
Behaviour	573	Operation encompass	20
Bullying	11	Racism	9
EHC	224	SEN	523
Early Help	15	Safeguarding	556
Time away/ suspension	18	Team Teach	3
Home	661	refer to social services	6
TAF	20	Red Card	25

These categories are unique to Stokes Wood Primary School and some incidents apply to more than one category.

Assessments

This academic year the SENDCo has completed 12 Learning Assessments for children at Stokes Wood Primary School. Once a set of assessments is completed, a report on the main findings is discussed with teacher(s) and parents/carers. A joint decision is then made about the next steps for the child.

For example, it could be decided that the child attends a specific intervention(s) and the child's progress is closely monitored (using Provision Map). Similarly, the parents/carers may be advised to take the child to the General Practitioner (GP) for a referral to paediatric services. We support parents with this process by either writing a report/letter to take to the GP or if requested, a member of the Pastoral Team may accompany the child and parent to a GP appointment.

From the internal assessments, we have been able to identify which children would benefit from further support from external agencies. In addition to school-based assessments, some

children were referred to the Learning Communication and Interaction Team (LCI) for further assessments.

<u>Attendance</u>

Throughout this academic year, Stokes Wood Primary School's pastoral team has continued to monitor attendance closely. Attendance for the academic year 22-23 is as follows:

Reception, Key Stage 1 and Key Stage 2										
All pupils 93.2%										
SEND	<mark>91.64%</mark>									
Pupil Premium	91.04%									
Non-Pupil Premium	94.36%									
EAL	94.10%									
Ethnic minority	93.59%									
White British	92.23%									

The pastoral team and the attendance officer liaise regularly to ensure all children's attendance is monitored closely at Stokes Wood Primary School. If a child is absent from school without a known reason, a text will be sent from the school office. If it is a family known to the pastoral team or children are regular non-attenders, a member of the pastoral team may call the family to ensure the children are safe and ask if we can support getting the child/children into school.

When there are problems or difficulties for families with attendance, the school can offer the walking bus, if appropriate. The school can discuss medical issues with parents and refer to the school nurse or support parents with any other issues from home.

If a child's attendance drops below 95% without good reason, we request an attendance panel meeting with our Education Welfare Officer. During the academic year, 35 children were referred to the Educational Welfare Officer. As a result of the meetings where a parent or carer attended, we could support the family by e.g. offering the walking bus if lateness was an issue, completing a school nurse referral if illness was the main concern. These meetings took place with a member of the pastoral team present in a supportive way. At many of these meetings it has enabled parents/carers to discuss underlying issues from home that the school could also support with. A record is kept in school with full details of the meetings and outcomes.

Attendance is also discussed at parents' evenings and review meetings with parents.

Parents/carers are also given an attendance certificate with their child's end of year report.

Finally, a letter is sent to Reception parents at the end of the academic year highlighting the

importance of good attendance in Key Stage 1 and the policies and procedures in place for poor attendance.

Education Health and Care Plans

Stokes Wood Primary School has had 20 children with an EHCP this academic year including 11 who attend the DSP.

Regular reviews are held with parents and professionals to discuss the children's achievements and further support that is needed.

Successes this academic year have included the accelerated progress of the Y6 children who were attending the morning interventions for the previous 2 years and joined main stream classes this year.

Results of Y6 sats

3 Year 6 SEND pupils won medals at the national athletics championships for SEND pupils in July 2023.

DSP

The DSP (Superstars group) is led and planned for by Sarah Woods (SENDCo) and Chloe Pollock (DSP teacher) with support from TAs who also have knowledge of Autism Spectrum Disorder (ASD), Attention Deficit Hyperactivity Disorder (ADHD) and Speech and Language support. The DSP accommodates 11 children with an additional 5 children who are able to work alongside and access the provision due to the similar needs. It is a provision for children who are not able to access the main curriculum in the classroom and need learning adapted to a significant level. Children from the DSP and Superstars join mainstream classes for relevant and appropriate mainstream activities. For example : assemblies, school trips, music, science, art etc.

The Superstars group accesses curriculum activities based on a combined Year 2-3 curriculum, using mostly practical and sensory approaches to learning. This is completed alongside specific interventions that include Attention Autism, Parallel Play, Fine Motor skills, Language for Thinking, Let's Talk, Emotional Language, Precision Teaching, Fun Time, Memory Games, and Language games.

The group attend weekly Forest School for a whole afternoon with a trained Forest school teacher.

The children were also able to participate in a variety of sporting activities, both those aimed at children with SEND, and alongside the rest of the school. The children took part in city and county wide SEND sporting events both competitive and non-competitive.

3 children from the Superstars group have moved on to Specialist settings in Year 7. 1 child has moved to a specialist setting in Y5 and 1 child has moved to mainstream in Stokes Wood Year 6.

Forest School Intervention

Children attending the Superstars/DSP have received weekly Forest School sessions. There have also been a selected group of mainstream children with SEND who have also benefitted from this intervention. Some have attended throughout the academic year, others more occasionally as required for their educational or emotional and social needs.

Children attending have had the opportunity to take part in a variety of activities that enabled them to build on their physical, Personal Social Health Education (PSHE), emotional

and communication skills. They have also had the opportunity to learn new practical skills, which has allowed children to develop their independence.

Teaching staff supported the children when trying things for the first time such as climbing a tree and sitting in the hammock. Teachers helped the children to feel confident in this new environment. Very quickly, children needed less and less support and were accessing these activities independently. Once they were confident in the surroundings, all children were able to self-explore and self-select what they wanted to do.

There was again, an improved level of communication between the children and staff and after a few weeks several children showed a higher level of interaction and language between themselves. New pairings were developed and they showed the ability to work together without seeking direction from adults.

Children that had attended the previous academic year were more open to taking part in the adult led activities and did this with increased levels of enthusiasm and sophistication. The level of attention, commitment and general pride shown in their work had increased significantly.

During adult directed Forest School activities such as tool use and campfires, the children all followed the rules and after a couple of sessions, were able to talk about/demonstrate the rules and safety measures independently. Pupils that had previously attended needed very few reminders at the beginning of the academic year. More experienced children confidently showed the new children what was expected.

Activities have included:

- Den making with tarpaulin, pegs and rope
- Den making with natural resources
- Clay faces
- Wind chimes
- Natural picture frames
- Campfire activities (marshmallows, popcorn, toast, omelettes)
- Tool use (Bow saw, folding saw, secateurs, hammers)
- Nature trails
- Scavenger hunts
- Mud kitchen play
- Gardening
- Care of the environment (weeding, planting etc)
- Variety of team games

This year, the pupils have consolidated acquisition of their previously learnt skills and their confidence levels have enabled them to share their skills with new pupils and help them take on further new challenges.

Nurture Group

Little Oaks provides inclusive opportunities for all children while closing the attainment gap. Nurture offers a mechanism by which some of our most vulnerable children can be supported. 'Little Oaks' has shown to improve social and emotional functioning, attainment in Literacy and Numeracy as well as the foundation subject curriculum.

It is safe to say the operation of 'Little Oaks' has not been without its challenges but it has been extremely rewarding to see the progress children have made and to have received such positive comments from other staff, outside agencies and the children themselves.

Sessions run in the afternoons, 3 or 4 days a week.

Little Oaks is a small group of up to twelve children, staffed by two supportive adults. It offers a short-term focused intervention which addresses barriers to learning caused by social or emotional difficulties. Children remain part of their own class group and usually return to their own class full-time after a maximum of four terms.

Pupils learn in an environment where the furniture is a mixture of home and school, so the space is safe, consistent and predictable for the children.

The day is structured to provide opportunities to address specific skills needed to become successful learners upon returning to a mainstream class.

Parental involvement is encouraged and has a positive impact on the children. Parents are invited in during special activities to share children's achievements and successes.

A typical day in little oaks

When the children enter the nurture room they are encouraged to place their name against how they are feeling using the zones of regulation board.

This is then discussed during emotional check in. This allows the children to express their feelings whilst nurture staff can address and provide the children with the tools to regulate.

Circle Time

One of the greatest benefits a child can get from circle time is the opportunity to socialize. The activities are excellent ways for children to get along with other children and adults.

They get to learn more about themselves as they relate to their fellow pupils as well as teachers. Nurturing a child's social skills early on is an important process which improves self-esteem, which in turn impacts on their learning.

Some children choose not to participate, which is accepted by nurture staff as we find that allowing them to decline their turn allows them to listen to others, gain confidence and realise it's a safe space to join in when they feel ready to.

Activities

After circle time we read a shared read using Rising Stars.

We find this is more beneficial for the children, as when we tried a guided read session it became apparent that the children were not ready for this due to the stage of phonics they were at and concentration levels were low.

After the children have settled into the structure of nurture, we start to introduce the foundation subjects for the afternoon. These are what the children would miss in the classroom during Little Oaks sessions.

The subjects covered science, PSHE and some literacy and maths. These sessions were shorter and within a small group and often included practical equipment allowing each child to complete the tasks given.

Other activities taking place are planned around the child's individual needs based on their Boxall profile score.

The Boxall Profile provides a framework for the precise assessment of children and young people's social and emotional aptitudes. It provides staff with insights and suggests points of entry into the child's world, allowing teachers to think about what lies behind their student's behaviour, and how to plan accordingly.

On completion, the scores of each individual student are compared to the standardised emotional literacy scores of children and young people of a similar age group.

Individualised, achievable targets for social and emotional aptitudes are then set for the student in the form of a personalised *Individual Learning Plan* which can be reviewed and re-assessed periodically as a whole-school approach.

At the end of the nurture intervention, children are reassessed to measure the progress made.

A total of 15 children attended the Nurture Group at some time in 2022-23.

All children made expected progress. For example : a child made 39 points progress (diagnostic)

19 points progress (developmental).

6 children were reintegrated back into class fulltime, no longer requiring the nuture grpup intervention.

SEND Actions for 2023-2024

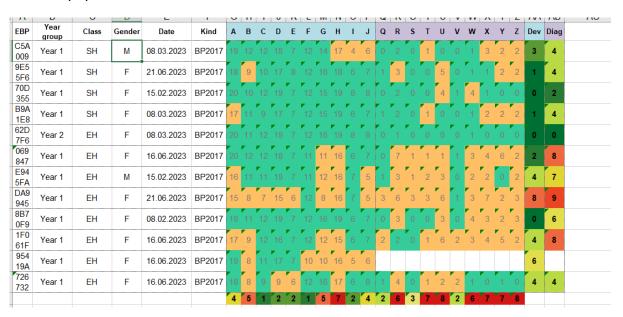

- To further utilise the Provision Map software to document the provisions SEND pupils have completed.
- To develop the effective use of the BERA documents.
- To continue to monitor the role of Teaching Assistants in supporting 1:1/key children regarding the feedback they give to pupils.
- To ensure DSP pupils are integrated well into mainstream activities where appropriate.
- To review and further develop planning and assessment in the DSP.
- To use the expertise of staff in the DSP to support pupils and staff in the mainstream classes.
- To participate in whole school Staff Occupational Therapy CPD
